the suffix ... In other words, the

CHAPTER 2

NOMINAL HEADLINES

A nominal headline ends with a noun (phrase), which in concatenation with the preceding constituents may constitute a sentence, a clause, or a phrase. It can also contain exclusively a compound noun or a simple noun. On the basis of the different structural possibilities mentioned above, the nominal headlines are classified into five types as follows: (i) sentential, (ii) clausal, (iii) phrasal, (iv) compound noun and (v) simple noun. While the first type of nominal headline is a sentence at both the surface and underlying levels, the other four types are derivable from an underlying sentence.

The frequency of occurrence of the nominal headlines in general in Kannada dailies ranges from 83% to 96%. The order of frequency of the five types of nominal headlines is as follows: phrasal > clausal > sentential > compound noun > simple noun.

The structure and function of the five types of nominal headlines are discussed in detail in this chapter.

2.1 Type 1: Sentential nominal headlines

The sentential nominal headline represents the structure of an equational sentence, which consists of a subject and a nominal predicate. The equational sentences in Kannada underlie a copula verb, which can be interpreted for the stative ('be') or inchoative ('become') meaning. The stative meaning is expressed

complement taking the suffix -aagi. In other words, the discontinuous morpheme sequence -aagi...iru as a unit is used as the stative copula. It is also used in the fused form aagiru. The inchoative meaning is expressed by the copula aagu 'become' in its different tense and aspectual conjugations. The present perfect form of aagu viz., aagiru 'has become' often overlaps with the fused stative copula form aagiru 'be'. The nominal negation is expressed by the negative form alla 'no'/'not', which is always given at the surface level of the sentence.

The nominal predicates used in equational sentences may serve as nominal complements or adjectival complements to the corresponding subjects. The structure and function of the sentential nominal headlines involving nominal and adjectival complements are dealt with in this section.

one-emp you parliament-dat send+starp
 serie ...

2.1.1 Subject + nominal complement

The nominal complement is used to define or identify its subject. It may contain a simple noun, a compound noun, a noun phrase, or a noun clause. The subject may include a pronoun, a noun, a noun phrase, or a noun clause. The structure subject + nominal complement may be preceded by different casual constituents. The focussing of the nominal complement is very frequent in sentential nominal headlines. Sometimes, very rarely, the sentential nominal headline involving nominal complement is expressed through two equational sentences with a common related subject.

... singular proximate
 ... in headline 2, the third person

2.1.1.1 Pronoun as subject

The first person pronouns, the third person proximate demonstrative pronouns and the universal indefinite pronoun are used as subjects of the nominal complement in the sentential nominal headlines.

Examples:

1. naanu kaangres sabinspekTar
I congress sub-inspector
'I am a congress sub-inspector'
2. idu nanna koneya Tarm : seeT
this my last term : Sait
'this is my last term :Sait'
3. ivaree niivu samsattige kaLisida
these people-emp you parliament-dat send-pst+rp
karnaaTakada pratinidhigaLu
Karnataka-gen representatives
'these only are the Karnataka's representatives you sent to the parliament'
4. ella Thakkara pakSa
all cheats-gen party
deevilal
Devilal
'all are parties of cheats - Devilal'

The first person singular pronoun naanu 'I' is the subject in headline 1, the third person neuter singular proximate demonstrative pronoun idu 'this' in headline 2, the third person human plural pronoun with emphatic particle ivar(u)-ee 'these

persons only' in headline 3 and the universal indefinite neuter pronoun ella 'all' in headline 4 (ella is a variant of ellavu 'all things'). In headline 4, the plural marker -gaLu has been deleted from the nominal complement Thakkara pakSa(gaLu) 'parties of cheats'. The deletion of plural marker here is in line with the informal and popular usage. The nominal complement is a compound noun in headline 1 (sabinspekTar 'sub-inspector'), a genitive phrase in 2 (nanna koneya Tarm 'my last term') and 4 (Thakkara pakSa 'parties of cheats') and a noun clause containing relative clause in 3 (niivu samsattige kaLisida karnaaTakada pratinidhigaLu 'the representatives from Karnataka whom you sent to parliament').

All the four headlines exemplified above have in their underlying structures the stative copula aagiru (or aagi...iru) 'be' in its present indefinite form (aagiddeene 'am- I' in headline 1, aagide 'is-it' in headline 2, aagiddaare 'are-they (human)' in headline 3, and aagive 'are-they (non-human)' in headline 4), which is not used in Kannada at the surface level.

The performative subject i.e., the speaker of the statement is given in headlines 2 and 4 (seeI 'Sait' in 2 and deevilaal 'Devilal' in 4). For the other two headlines (1 & 3), it has to be recovered from the news story.

2.1.1.2 Proper noun as subject

The proper nouns denoting persons are often used as the subjects of the nominal complements in the sentential nominal headlines in India 7 : 10 October 2007 Language of Kannada Dailies M. N. Leelavathi, Ph.D. 44

Examples: pi.vi.en headline 5 is asaru 'became-he' or

5. pi.vi.en lookasabhe sabhaanaayaka native sense. It

P.V.N parliament leader appretation to the form

'P.V.N is parliament leader' asaru 'will become-he'

6. vaajpeeyi pradhaani shudu 'become' is

Vajpayee Prime Minister shudu 'may become', the

'Vajpayee will become Prime Minister' the sense of

7. sooniya gaandhi kaangai adhyakSe the present

Sonia Gandhi Cong-I president

'Sonia Gandhi may become Congress-I president'

8. giriish kaarnaad shreeSTa naaTakakaara kind of

Girish Karnad best play-wright

'Girish karnad is the best play-wright'

In headlines 5-8, the proper nouns pi.vi.en

'P.V.Narasimha rao', vaajpeeyi 'Vajpayee', sooniyaagaandhi

'Sonia Gandhi' and giriish kaarnaad 'Girish Karnad' are

respectively the subjects used. In headline 6, the nominal

complement is a simple noun pradhaani 'Prime Minister' and in

headlines 5, 7 and 8, it is a compound noun, lookasabhe

sabhaanaayaka 'parliament leader', a noun + noun compound in 5,

kaangai adhyakSe 'Congress-I president' a noun + noun compound in

7 and shreeSTa naaTakakaara 'the best play wright', an

adjective + noun compound in 8. The absence of the third person

human honorific marker -aru in the nouns sabhaanaayaka 'leader'

and naaTakakaara 'play-wright' and the use of feminine singular

form in the noun adyakSe 'president' are indicative of the

preference for popular and informal style in newspaper language.

The underlying copula in headline 5 is aadaru 'became-he' or aagiddaare 'has become-he' both giving the inchoative sense. It is also possible to give a stative interpretation to the form aagiddaare 'is-he'. In headline 5, aaguttaare 'will become-he' the non-past form of inchoative copula aagu 'become' is underlying. In headline 7, aagabahudu 'may become', the inchoative copula in potential mood revealing the sense of speculation, is the possibility. In headline 8, the present indefinite form of the stative copula viz., aagiddaare (-aagi...iddaare) 'is-he' is involved.

The headlines 5-8, which represent a general kind of reporting, do not require a performative subject.

2.1.1.3 Noun phrase as subject

The noun phrase as subject of the nominal complement may include genitive or other casual phrases.

Examples:

9. taareyara karabaaki 8.24 kooTiruu
film actresses-gen tax balance 8.24 crore rupees

'the income tax dues of film actresses is 8.24 crore rupees'

10. sandhaanakke oppige namma jaya-bangaarappa
treaty -dat consent our success-Bangarappa

'the consent for the treaty is our success-Bangarappa'

The subject of the nominal complement in headline 9 is the genitive phrase taareyara karabaaki 'the tax dues of film

actresses' and in 10, it is a phrase of dative noun + noun,

sandhaanakke oppige 'acceptance for treaty'. The nominal complement is a compound noun in 9 (8.24 kooTiruu '8.24 crore rupees') and a genitive phrase in 10 (namma jaya 'our victory').

Both the headlines given above underlie the stative copula in its present indefinite form aagide 'is-it'. The inchoative interpretation is also possible for 9.

The performative subject is given in headline 9 (bangaarappa 'Bangarappa') and for 8 it is not required as the headline is a general kind of reporting.

The meaning expressed by the term sandhaana 'treaty' is incomplete without the specification as to 'which treaty' and this information is recoverable from the news story.

2.1.1.4 Noun clause as subject

The noun clause containing the relative clause is often used as the subject of the nominal complement.

Example:

11. jagattige beLaku niiDuva raaSTra nammadu
world-dat light give-npst.rp country ours

'the country which gives light to the world is ours'

The subject in the above headline is the noun clause jagattige beLaku niiDuva raaSTra 'the country which enlightens the world' and the nominal complement is the possessive pronominal predicate nammadu 'ours'.

The copula underlying the above headline is the stative indefinite present form aagide 'is-it'.

recovered from the news story. Headlines 11 and 12. The original

2.1.1.5 Topicalization of nominal complement

The nominal complement is quite often focussed through topicalization in sentential nominal headlines. In this process, the usual structure subject + nominal complement is reordered as nominal complement + subject.

12. neepaaLi कांग्रेस नायका कोयिराला
Nepali Congress leader Koirala

'the leader of Nepali Congress is Koirala'

13. svatantra अस्तित्वादात्मक सामाजिक संगठन
independent existence-gen social organization
muslim liig
Muslim League

'a social organization of independent existence is Muslim league'

14. gadyapadyaGala ಸೊಗಸಾದ ಸಮ್ಮಿಲನ
prose-poetry - gen beautiful mixture
gookaak saahitya
Gokak literature

'a beautiful mixture of prose and poetry is Gokak's literature'

15. soolina ಅಂಜಿನಲ್ಲಿ ಗೆಲುವು ಕಂಡವರು ಇವರು
defeat-gen verge-loc victory see-pst.rp-pro they-prox
'who gained victory in the verge of defeat are these'

In headlines 12-15, topicalization has been executed by placing the nominal complement before the subject. In headline 12, the nominal complement neepaaLi कांग्रेस नायका 'leader of Nepali Congress' is a compound noun and its subject कोयिराला

'Koirala' is a proper noun. In headlines 13 and 14, the nominal complements are genitive phrases, svatantra astitvada saamaajika sanghaTane 'a social organization of independent existence' and gadyapadyagala sogasaada sammiLana 'beautiful mixture of prose and poetry' respectively. The subjects of the above nominal complements are the proper noun muslim liig 'Muslim League' and the genitive phrase gookaak saahitya 'Gokak's literature' respectively.

In headline 15, the nominal complement is the noun clause marked by the participial noun soolina ancinalli geluvu kaNDavaru 'who gained victory on the verge of defeat' and its subject is the third person proximate human plural pronoun ivaru 'these'.

The copula recovery is not possible after topicalization. It can be recovered in the original structure subject + nominal complement. The headline 12 in its original structure underlies the inchoative copula in the past indefinite form aadaru 'became-he' or the present perfect form aagiddaare 'has become-he'. The present indefinite stative 'is-he' interpretation is also possible. The underlying copula for the original structures of the headlines 13,14,and 15 is the stative copula in its present indefinite form. It is aagide 'is-it' in headlines 13 and 14 and aagiddaare 'are-they' in headline 15.

The performative subject is not required for the headline 12 as it involves a general form of reporting and for the headlines 13-15 it has to be recovered from the news story.

2.1.1.6 Subject + nominal complement preceded by other casual constituents

An instance of subject + nominal complement structure being preceded by a dative noun phrase is exemplified below.

16. dakSiNa aafrika taNDakke klaivrais naayaka

South Africa team-dat clive Rice leader

'the leader for South African team is Clive Rice'

In the above headline, the nominal complement is the noun naayaka 'captain', the subject is the proper noun klaivrais 'Clive Rice' and the casual constituent preceding is the dative phrase consisting of a compound noun dakSiNa aafrika taNDakke 'for the South African team'.

The above headline underlies the copula aadaru 'became-he', the past indefinite form of the inchoative, or aagiddaare 'has become-he'/'is-he', the present perfect form of the inchoative or the present indefinite form of the stative.

The above headline as a general form of reporting does not require a performative subject.

2.1.1.7 Repetition of subject + nominal complement structure

The sentential nominal headline involving nominal complement, sometimes, has the subject + nominal complement structure repeated when the subject needs to be split. This is used especially with statements involving two contradictory qualities of the same subject, which is named as 'oxymoron' in

Example:

17. hesaru obbaradu, aDDa hesaru mattobbaradu
 name one person's, surname another person's
 'the name is one's, and the surname is another's'

In the above headline, there are two equational sentences. The facts expressed in the first and second sentences are in contradiction to each other. The subject in the first sentence is the simple noun he-sru 'name' and in the second sentence, it is the compound noun aDDa hesaru 'surname', both having a common referent. The nominal complements obbaradu 'one's' and mattobbaradu 'another's' are possessive pronominal predicates.

The stative copula in its present indefinite form aagide 'is-it' underlies the above headline.

The performative subject is not given and it is recoverable from the news story.

2.1.2 Subject + adjectival complement

The adjectival complement refers to a permanent or temporary quality of its subject. The adjectival complement may be an adjective or a noun functioning as adjective. The subject of the adjectival complement attested from the data is a compound noun, a noun phrase, or a noun clause. The structure subject + adjectival complement can be preceded by different casual constituents. The sentential nominal headlines involving adjectival complement are not found to be topicalized.

2.1.2.1 Compound noun as subject

The compound noun is used as the subject of the adjectival complement less frequently than the noun phrase or noun clause. Consider the following example:

18. pablik pariikseyee leesu
 public examination-emp better
 'public examination itself is better'

In the above headline, the subject is the compound noun pablik pariikSe 'public examination', which is added with the emphatic particle -ee 'itself'. The adjectival complement is the word leesu 'good' / 'proper', which is always used in the predicative function. It is never used in the attributive function.

The copula underlying the above headline is the stative form aagide 'is-it'.

The performative subject is not given and it is recoverable from the news story.

The five headlines exemplified in 19-23 are given below.

2.1.2.2 Noun phrase as subject

The noun phrase which is frequently used as the subject of the adjectival complement is the genitive phrase. The genitive case marker may be overt or covert.

Examples: of meaning in Sandre's poems

19. karnaaTakada niluvu duradriTakara
 Karnataka-gen stand unfortunate
 'Karnataka's stand is unfortunate'

20. beendreyavara kavanagaLa arthavingaDaNe ^{locative phrase}
 Bendre -gen poems -gen meaning assignment ^{relative clause}
 kaSTakara ^{adjective}
 difficult ^{adjective} in headlines 19 and 20, surakSita
 'assigning meaning to (the poet) Bendre's poetry is ^{from}
 difficult' ^{adjective}
21. pradhaani cunaavaNe jayada ^{fact} maatu bhrame ^{the}
 Prime Minister election victory -gen fact illusion
 'the fact that the Prime Minister will win the election is an
 illusion' ^{adjective}
22. prabhaakararaav neemaka ^{and} tappu ^{adjective}
 Prabhakara Rao appointment wrong surakSita 'safe' is
 'the appointment of Prabhakara Rao is wrong' ^{adjective}
23. savdiyallina ella bhaaratiiyaruu surakSita ^{the}
 Saudi-loc-gen all ^{Indians-emp} Safe ^{the}
 'all the Indians in Saudi Arabia are safe' ^{adjective}

All the five headlines exemplified in 19-23 have a genitive noun phrase as the subject of the adjectival complement. In headlines 19-21 and 23, the genitive phrases used are marked with genitive case marker -a (karnaaTakada niluvu 'Karnataka's stand' in 19, beendreyavara kavanagaLa artha vingaDaNe 'making out the intricacies of meaning in Bendre's poems' in 20, pradhaani cunaavaNe jayada maatu 'the fact of the Prime Minister winning the election' in 21 and savdiyallina ella bhaaratiiyaruu 'all the Indian's in Saudi' in 23). In headline 22, the genitive phrase prabhaakararaav neemaka 'the appointment of Prabhakara Rao' is not marked with the genitive case marker. In headline 23, the

genitive case marker -a is added to the locative phrase savdiyalli-n-a, which is a reduced form of the relative clause structure savdiyalli iruva 'who are in Saudi'.

The complements in headlines 19 and 20, duradriSTakara 'unfortunate' and kaSTakara 'difficult' ^{ave} derived respectively from the quality nouns duradriSTa 'misfortune' and kaSTa 'difficulty' with -kara as the adjectival suffix. The above two adjectives in the predicate positions as complements actually stand for the respective nominalised adjectival forms duradriSTakaravaadaddu and kaSTakaravaadaddu. In headlines 21 and 22, bhrame 'illusion' and tappu 'fault' are quality nouns used as adjectival complements in the meanings 'illusionary' and 'faulty' respectively. The complement in headline 23, surakSita 'safe' is an adjective derived from the noun surakSa 'safety' ^{explosive}.

The headlines exemplified in 19 to 23, all underlie the present indefinite stative copula aagiru 'be' (duradriSTakaravaagide 'is unfortunate' in 19, kaSTakaravaagide 'is difficult' in 20, bhrame aagide 'is illusionary' in 21, tappaagide 'is wrong' in 22, and surakSitavaagiddaare 'are safe' in 23)

The performative subject is not given in all the five headlines and it is recoverable from the news story.

2.1.2.3 Noun clause as subject

The noun clause containing the adjectival clause + noun or the gerundial noun as head are attested.

Subject + adjectival complement structure headed by

Examples:

24. mahiLe dharisidda
 woman wear-pst.rp
 sphooTa kaaraNa
 explosive reason

'the explosive which the woman was wearing is responsible'

25. raajyavannu upeekSisi
 state- acc neglect-pp
 pradhaaniyaaguvudu asaadhya
 Prime Minister become-npst.ger impossible

'neglecting the state, becoming Prime Minister is impossible'

In headline 24, the noun clause containing the adjectival clause mahiLe dharisidda sphooTa 'the explosive that the lady was wearing' is the subject of the adjectival complement kaaraNa 'reason'/'responsible'. In headline 25, the subject is the noun clause raajyavannu upeekSisi pradhaaniyaaguvudu 'having neglected the state, becoming Prime Minister', where the gerundial head noun pradhaaniyaaguvudu 'becoming prime minister' is modified by the adverbial clause of manner raajyavannu upeekSisi 'having neglected the state'. The complement is the adjective asaadhya 'impossible'.

The above headlines underlie the copula aagiru 'be' in its present indefinite stative sense (kaaraNavaagide 'is responsible' in 24 and asaadhyavaagide 'is impossible' in 25).

The performative subject is not given in both the headlines and is recoverable from the news story.

2.1.2.4. Subject + adjectival complement structure preceded by other constituents

The subject + adjectival complement structure is found to be preceded by casual constituents like dative phrase, instrumental phrase, or locative phrase and postpositional phrases like the comparative.

Examples:

26. bhaarataratnada aaykege niiti agatya
Bharat Ratna-gen selection-dat guidelines necessary
'guidelines are necessary for the selection of Bharata Ratna award'
27. aaDaLitapakSadinda aacaarasamhite ullanghane
ruling party- ins code of conduct violation
shikSaarha
punishable
'violation of the code of conduct by ruling party is punishable'
28. eStu raajyagaLalli kaanuunu sthiti uttama
how many states-loc law and order situation excellent
'in how many states is law and order situation excellent'
29. gavDarige raajyada hitakkinta adhikaara mukhya
Gowda-dat state-gen welfare-dat-comp position important
'political power is more important for Gowda than that of the welfare of the state'
30. seksginta haNa meelu
sex-dat-comp money powerful

In headline 26, agatya 'necessary' is the adjectival complement of the subject niiti 'guidelines' and this structure subject + adjectival complement is preceded by the dative phrase bhaarata ratnada aaykege 'for the selection of Bhaarata Ratna'. In headline 27, shikSaarha 'punishable' is the adjectival complement of the subject aacaara samhite ullanghane 'violation of code of conduct,' which is preceded by the instrumental phrase aaDaLitapakSadinda 'by the ruling party'. In headline 28, uttama 'excellent' is the adjectival complement of the subject kaanuunu sthiti 'the law and order situation', which is preceded by the locative phrase eSTu raajyagaLalli 'in how many states'. In headline 29, mukhya 'important' is the adjectival complement of the subject adhikaara 'power', which is preceded by the comparative phrase raajyada hitakkinta 'than the state's welfare' and the dative phrase gavDarige 'to Gowda'. In headline 30, meelu 'more powerful' is the adjectival complement of the subject haNa 'money', which is preceded by the comparative phrase seksginta 'than sex'.

All the five headlines exemplified above in 26-30 underlie the copula aagiru in its present indefinite stative sense (agatyavaagide 'is necessary' in 26, shikSaarha aagide 'is punishable' in 27, uttamavaagide 'is excellent' in 28, mukhya aagide 'is important' in 29 and meelaagide 'is more powerful' in 30).

The performative subject is not mentioned in all the five headlines and it is recoverable from the news story.

niivavalla:

2.1.3 Negative sentential nominal headlines

The negative sentential nominal headlines are formed by adding alla 'no/not' to the end of the equational sentence. alla may be suffixed to the complement, nominal or adjectival, or written independently. The use of negative sentential nominal headline is not very frequent.

Examples:

31. karnaaTaka niirugaNTi . alla

Karnataka water-quarrelsome not

'Karnataka is not water-quarrelsome'

32. kriSNa kaaveeri : korate

Krishna Cauvery: shortage

haNaddalla; sibbandiyadu

money of it-not; staff of it

'for Krishna-Cauveri project, shortage is not of money but of staff'

33. bhinnaabhipraaya . abhivriddhi

difference of opinion development

kaaryakke aDDi alla

programme -dat obstacle not

'difference of opinion is not an obstacle for developmental programmes'

34. aakaasha niiliyalla

sky blue not

'the sky is not blue'

negative form alla is fused with the
Language in India 7 : 10 October 2007 Language of Kannada Dailies M. N. Leelavathi, Ph.D. 58
cate manava kalyaanakke, 'for people's welfare'.

35. varadi nijavalla: akkaagi naDayuTiruvuda 'that report is
report true not false' the gerundial noun
araNya adhikaari spaSTane or positive marker akka appa to
forest officer clarification

'the report is not true: forest officer's clarification'

36. kolliyuddha maanava kalyaaNakkalla: shaasaka
gulf war people welfare-dat-not: legislator
ranganaath real nominal headlines

Ranganath nominal headline consists of a noun(phrase),

'gulf war is not for people's welfare: legislator Ranganath'

In headlines 31-33 and 36, the negation of nominal complement is involved, whereas in headlines 34 and 35, it is negation of adjectival complement. In headlines 31 and 33, alla is written independently and in other headlines (32,34,35 and 36), it is suffixed to the corresponding complement. In headline 32, both negative nominal complement (haNaddalla 'not of money') and the affirmative nominal complement (sibbandiyadu 'of the staff') having the same subject (korate 'shortage') are given. The negative is used here to further ascertain and emphasize the fact expressed by the affirmative. In headline 33, the dative phrase abhivriddhi kaarayakke 'for developmental programmes' has been juxtaposed after the subject bhinnaabhipraaya 'difference of opinion' and before the negative nominal complement aDDi alla 'is not obstacle'. In other cases three forms

In headline 36, negative form alla is fused with the nominal predicate maanava kalyaaNakke, 'for people's welfare'.
Language in India 7 : 10 October 2007 Language of Kannada Dailies M. N. Leelavathi, Ph.D. 59
This is actually a truncated version of the gerundial noun

on is frequently used as a noun phrase, maanava kalyaanaNakkaagi naDeyuttiruvudu 'that which is going on for people's welfare'. The gerundial noun naDeyuttiruvudu has been deleted along with the purposive marker -aagi appended to the dative form maanava kalyaanaNakke.

The performative subject is given in headlines 35 and 36 only and for others it is recoverable from the news story.

2.2 Type 2: Clausal nominal headlines

The clausal nominal headline consists of a noun (phrase), which is preceded by one of the following four forms of non-finite verbs: (i) Relative participle, (ii) Infinitive, (iii) Past participle and (iv) Conditional participle. The structure and function of the above four non-finite forms in clausal nominal headlines are dealt with in this section.

2.2.1 Relative participle

There are three forms of relative participles in Kannada, the past, the non-past and the negative. The past relative participle is formed by adding the relative participle marker -a to the past stem (e.g., band + a = banda). The non-past relative participle is formed by adding the suffix -uva to the verb root (e.g., bar + uva = baruva). The negative relative participle is formed by adding the suffix ada to the verb root (e.g., bar + ada = barada). The relative participle in any of these three forms in association with different casual constituents forms an adjectival clause, which modifies the noun (phrase) that follows and that belongs to the main clause. The adjectival clause and

clause, which is frequently used as a nominal headline.

The adjectival clause containing the relative participle in its underlying structure is a sentence with a finite verb from which the relative participle is derived. If the adjectival clause in its underlying structure has a noun (phrase) coreferential to the head noun (phrase), then the adjectival clause is called a relative clause; otherwise it is a complement clause (see Ramasamy, 1988). Consider the following examples:

37. sadanakke jigida preekSaka
assembly-dat jump-pst.rp spectator

'the spectator who jumped into the assembly hall'

37a. preekSaka sadanakke jigidaⁱ -preekSakaⁱ
↓ i ↓
jump-pst-3sm
jigida

38. sheekhar kaangai seeruva shanke
Shekhar congress-I join-npst.rp indication

'the indication that Chandrashekar may join Congress-I'

38a. sheekhar kaangai seerabahudu (emba) shanke
↓ ↓
join-inf-may compl
↓ ↓
seeruva

In headline 37, the adjectival clause sadanakke jigida 'who jumped into the assembly hall' has in its underlying structure the noun coreferential to the headnoun preekSaka 'spectator' as subject of the verb jigi 'jump' and it is called the relative clause (cf. 37a). In headline 38, the head noun shanke 'doubt'

does not form a part of the sentence underlying the adjectival clause sheekhar kaangai seeruva 'that Shekhar may join Cong-I' and this clause functions as a complement to the head noun shanke (cf. 38a) defining what shanke 'doubt' is. The complement clause is alternatively formed by inserting the complementizer emba meaning 'that' between the finite verb of the constituent sentence and the head noun. The relative participle in a complement adjectival clause is equivalent to the sequence of finite verb + emba (seerabahudu emba = seeruva).

The use of the relative clause and the complement clause in clausal nominal headlines is described in detail below.

2.2.1.1 Relative clause + noun(phrase)

The relative clause is formed by deleting the noun (phrase) in the underlying sentence, which is coreferential to the head noun (phrase) and making the finite verb a relative participle. This is how the headline exemplified in 37 is derived from 37a. The deleted noun (phrase), which is also called as relativised noun(phrase), may be a subject, an object or other casual constituents in the underlying sentence. The relative clause thus formed is used to limit the referential scope of the head noun(phrase) in its restrictive function or merely to give an additional information or description about the head noun (phrase) in its non-restrictive function (see Ramasamy, 1988).

The use of the relative clause in clausal nominal headlines in different structural and functional contexts is dealt with in this section.

2.2.1.1.1 Subject noun(phrase) relativized

The relative clauses involving relativization of subject noun (phrase) are found to be very frequently used in clausal nominal headlines.

Examples:

39. kuDukanige paaTha kalisida aane
 drunkard-dat lesson teach-pst.rp elephant

'the elephant which taught lesson to the drunkard'

39a. (aane) kuDukanige paaTha kalisitu - aane

 'those who refused the wealth which came on its own'

44a. (yaaroo) olidubanda Laksmiyannu olle endaru yaaroo
 i say-pst-3pl i
 enda -aru ve
 endavaru

The underlying structure given under each of above

headlines and the structural changes noted therein explain how

44, the relative clause is used in the restrictive function while in 40, it is used in the non-restrictive function. In headline 39, the relative clause kuDukanige paaTha kalisida 'which taught a lesson to the drunkard' restricts the referential scope of the head noun aane 'elephant'. Similarly, in headline 41, the relative clause haalU kareyuva 'which milks' restricts the referential scope of the head noun hoota 'he-goat'. In headlines 42, 43 and 44, the restrictive relative clauses used in their order are idduu illada, 'which is not, though it is', suraksitavaagadee hooda 'which was not maintained' and olidu banda lakSmiyannu olle enda 'who denied the Laksmi (wealth) which came on its own', which respectively modify the head nouns raste 'road', shavcaalaya 'toilet' and yaaroo 'someone'. In headline 39, the head noun is the proper noun sriikaant 'Srikant', which is preceded by the non-restrictive relative clause bhaaratakke beLakaada 'who became lamp for India' (by bringing victory to India in cricket), which merely describes the attribute of the head noun.

The past relative participle is used in the relative clause of the headlines 39 (kalisida) and 40 (beLakaada) and 43 (surakSitavaagadee hooda), the non-past relative participle in that of headline 41 (kareyuva) and the negative relative participle in that of the headline 42 (illada). In headline 43, the negation of the relative clause has been expressed not through the negative relative participle but through using the negative past participle form of the main verb surakSitavaagu while keeping the completive auxiliary verb hoogu in the past

the corresponding participle and the proform of the following head noun, which is an indefinite pronoun (yaaroo), are fused together to form the participial pronoun (endu + aru = endavaru) (see Ramasamy, 1988). It is also found in the above headline that the accusative noun phrase lakSmiyannu is modified by the relative clause olidu banda 'which came on its own'.

2.2.1.1.2 Object noun (phrase) relativised

The relative clauses involving relativization of object noun (phrase) are found to be used in clausal nominal headlines frequently, but not so frequently as those involving relativization of subject noun (phrase).

Examples:

45. akriyakke tetta daNda
 misdeed-dat pay-pst.rp penalty
 'the penalty which was paid for the misdeed'

45a. (yaaroo) akriyakke (daNda vanna) tettaru -daNda
 pay-pst-3sh
 tetta

46. kaangai maNDali toorida jaaNatana
 Cong-I committee show-pst.rp smartness
 'the smartness which was shown by congress-I committee'

46a. kaangai maNDali (jaaNatanavannu) tooritu -jaaNatana
 show-pst-3sn
 toorida

From the corresponding underlying structures of the above two headlines, it is obvious that the relativised noun (phrase) is an object. In both the cases, the relative clauses are found to be restrictive in their function with respect to their head nouns. In headline 45, the relative clause akrityakke tetta 'which was paid for misdeed' modifies the head noun daNDa 'penalty' and in headline 46, kaangai maNDali toorida 'which con-I committee showed' modifies jaaNatana 'smartness'.

2.2.1.1.3 Instrumental noun(phrase)relativised

The relative clauses involving relativization of instrumental noun (phrase) are rarely found to be used in clausal nominal headlines.

Example: 'epilepsy' restrictively.

47. karaLu hiNDuva kiriyara manavi
intestine squeeze-npst.rp youngsters-gen appeal
'the youngsters' appeal which squeezes the intestine'.

47a. (kiriyara manaviyinda) karaLu hiNDu paDuttade kiriyara manavi
i squeeze-pass-pr-3sn i
i found to be clausal nominal
karaLu hiNDuva

In the above headline, the relative clause karaLu hiNDuva 'which squeezes the intestine' is the result of relativization of instrumental noun (phrase) i.e. the deletion of the instrumental noun phrase kiriyara manaviyinda 'by the appeal of the youngsters' and it modifies the head noun phrase kiriyara manavi 'appeal of youngsters' restrictively.

2.2.1.1.4 Dative noun (phrase) relativised

The relative clauses involving relativization of dative noun (phrase) are rarely found in clausal nominal headlines.

48. medehaLLiyalli muulakaaNada muurcerooga
 Medehalli - loc reason-visible-neg.rp epilepsy

'the epilepsy for which the reason is not known in Medehalli'

48a. medehaLLiyalli (muurceroogakke) muulakaaNuvudilla-muurcerooga
 ↓ ↓ i ↓ ↓ i
 ajiliv haryakaru not visible-npst.ger -oels
 muula kaaNada ↓ ↓ -pst-3pl

In the above headline, the relative clause muulakaaNada 'for which reason is not found' is the result of deleting the dative noun(phrase) muurceroogakke 'for epilepsy' and it modifies the head noun muurcerooga 'epilepsy' restrictively.

The negative relative participle is involved in this relative clause.

2.2.1.1.5. Locative noun(phrase) relativised

The relative clauses involving relativization of locative noun(phrase) are found to be frequently used in clausal nominal headlines.

Examples:

49. upakaraNagaLillada baLLaari
 apparatus-be-neg.rp Bellari
 kivuDumakkaLa shaale
 deaf children-gen school

'the Bellari school for deaf children, which has no

49a. (baLLaari kivuDumakkaLa shaaleyalli) upakaraNagaLilla-
 i be-neg
 iati are not found
 baLLarri kivuDumakkaLa shaale upakaraNagaLillada
 i relative clause
 single head noun (phrase).

50. raajiiv hantakaru tangida nele
 Rajiv assassins stay-pst.rp place
 'the place where Rajiv's assassins stayed'

50a. raajiiv hantakaru (yaavudoo ondu neleyalli) tangidaru -nele
 i stay-pst-3pl i
 rt corporation wh: her did n
 it to others' tangida

The relative clauses, upakaraNagaLillada 'where apparatus are not available' modifying the head noun phrase baLLaari kivuDumakkaLa shaale 'the school for the deaf children at Bellary' in 49 and raajiiv hantakaru tangida 'where Rajiv assassins stayed' modifying the headnoun nele 'place' in 50, are derived by deleting locative noun phrases as shown in the respective underlying structures above. Both are restrictive relative clauses.

The relativizability hierarchy reflected in relative clause + noun (phrase) type of clausal nominal headlines is subject NP > object NP > locative NP > instrumental NP > dative NP. That is to say that the subject NP is more easily accessible for relativization than the other casual noun phrases, the object NP, locative NP, instrumental NP and dative NP revealing relatively lower degree of accessibility in their order. This finding arrived at from the data on newspaper headlines is found

by Keenan and Comrie(1977). The casual noun (phrases) like ablative, sociative, etc are not found to be relativised.

It is rarely observed that two relative clauses are stacked to modify a single head noun(phrase).

Example:

51. taanuu maaDada beereyavariguu biDada saarige samsthe
 itself-emp do-neg.rp others-dat-emp entrust-neg.rp transport
 corporation

'the transport corporation which either did not do itself or leave it to others'

In the above headline the subject noun phrase saarigesamsthe 'road transport corporation' is relativised and modified by two restrictive relative clauses taanuu maaDada 'which did not do it by itself', and beereyavariguu biDada 'which did leave or entrust it to others.'

Two relative clauses in succession in a single headline is also found.

Example:

52. divaaLi edda deesha, mandirakke baDidaaDuva jana

biidi, sigaref, paan

'the country which has been bankrupted and the people who fight for temple'

52a. (deesha) divaaLi eddide -deesha ,
 ↓ i ↓ ↓ i
 ↓ ↓ ↓ ↓
 ↓ ↓ ↓ ↓
 ↓ ↓ ↓ ↓

(jana) mandirakke baDidaaDuttiddaare -jana
 ↓ i ↓ ↓ ↓ i
 ↓ ↓ ↓ ↓
 ↓ ↓ ↓ ↓
 ↓ ↓ ↓ ↓

In the above headline, the two noun clauses containing two different relative clauses are separated by comma, which represents locative sense. The first noun clause divaaLi edda deesha(dalli) 'in the country which has become bankrupt' is in locative relationship with the second noun clause mandirakke baDidaaDuva jana 'the people who fight for temple'. Both the relative clauses divaaLi edda and mandirakke baDidaaDuva are used in the non-restrictive sense with respect to their corresponding head nouns deesha 'country' (India) and jana 'people' (Indians), which are definite nouns.

Relative clauses used in clausal nominal headlines are found to be often associated with figures of speech like personification and metaphor. Consider the following examples:

53. munidu maariyaada formed kaaveeri
 get angry-pp Maari-become-pst.rp Cauvery
 'the Cauvery who got furious and became Mari (destroying deity)'

'in Rajyothsava'. The first locative phrase urdu^{vi}nalli 'in Urdu', has become a compound with the noun bhaaSaNa 'speech' by undergoing locative case marker deletion. In headline 144, the locative phrase jaNTi valayadalli 'in joint sector' has been topicalised. The ending noun (phrase) in the original structure vijayanagara sthaavara 'Vijayanagar plant' takes the collocative verb sthaapisu 'establish' to become a complete sentence. The subject noun has been deleted.

In longer phrasal nominal headlines, the structure locative noun phrase + noun phrase can be preceded by other casual phrases, postpositional phrase, infinitive clause, or past participle clause.

Examples:

145. bhaaratada kaarige briTanninalli bhaari beeDike

India-gen car-dat Britain-loc great demand

'great demand in Britain for Indian cars'

145a. bhaaratada kaarige briTanninalli bhaari beeDike (uNTaagide)

146. satta handigaagi jagala : baLLaari

die-pst.rp pig-purp quarrel : Bellary

baLi gaaliyalli gunDu

near air-loc firing

'quarrel for dead pig: shooting in the air near Bellary'

A feeling of 'anguish' over the larger proportion of road accidents is reflected.

Purpose (four dots) (infinitive deletion)

110. sudhaaraNe....yoojane

improvement....schemes

'improvement....schemes'

110a. sudhaaraNe. (taralu) yoojane (haakikoLLalaayitu)

(bring-inf)

undertake-imp-pass-3sn

-pst -
^

A feeling of 'hopefulness' for a future betterment through proper planning is implied.

Underlining

Underlining is used in headlines to demarcate shoulder head in a multidecker and also to focus on a very important message.

Examples:

Demarcating shoulder head

111. rashiid kole prakaraNa

Rasheed murder incident

muuvaru poolisara jaamiinige

three policemen-gen bail-dat

madraas haikoort aadeesha

Madras Highcourt order

'in connection with the Rasheed murder incident, Madras Highcourt ordered to release three policemen on bail'

meaning of source. The subject has been deleted. The structure ablative noun(phrase) +noun(phrase) can be preceded by other casual phrases like subject and object.

Examples:

129. maikel Til sTaarm spardhaa kaNadinda horakke
 Michael Til storm competition field-abl out

'Michael Til storm is out from the field of competition'

129a. maikel Til sTaarm spardhaakaNadinda horakke (hoodaru)

130. innuu 8 sadasyaru kaangaininda amaanatu
 still 8 members cong: I-abl suspension

'8 more members suspended from Congress-I'

130a. X(nom) innuu 8 sadasyaru (annu) kaangaininda

amaanatu (golisu)

suspend-pst-3sn

In headline 129, the ablative noun phrase + postpositional phrase spardhaa kaNadinda horakke 'out from the field of competition' is preceded by the subject maikel Til sTaarm 'Michael Til Storm' and in 130, kaangaininda amaanatu 'suspension from congress' is preceded by the object noun phrase innuu 8 sadasyaru '8 more members'.

2.3.1.6 Possessor noun (phrase) + ^{possessed} noun (phrase) (genitive noun phrase)

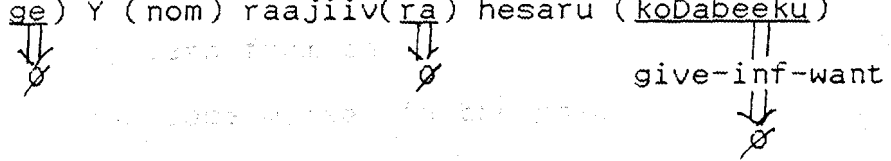

The genitive noun phrase, which consists of a possessor noun(phrase) and a possessed noun(phrase) is the most frequently used structure in phrasal nominal headlines. Since the use of genitive case marker is optional in the language, it may be overt or covert. The genitive noun phrases may be inherent or derived from different casual sources like subject, object, etc or from a complement phrase or clause.

2.3.1.6.1 Inherent genitive noun phrase

The inherent genitive noun phrases used in phrasal nominal headlines are generally found to be truncated forms of a verbal or nominal sentence.

Examples:

131. raajiiv hesaru
 Rajiv name
 'Rajiv's name'

131a. X (ge) Y (nom) raajiiv(ra) hesaru (koDabeeku)

132. vishva samsthe bhadrataamaNDali
 United Nations Organization security council
 nirNayagaLa saaraamsha
 decisions-gen gist
 'gist of the decisions of the security council of the United

132a. idu vishvasamsthe (ya) bhadrataamaNDali

↓
∅

↓
∅

nirNayagaLa saaraamsha

The genitive noun phrase raajiiV hesaru 'the name of Rajiv Gandhi' which forms headline 131, is the object of the underlying verb koDabeeku 'must give'. The related dative (benefactive) and subject noun phrases have been deleted as revealed in the underlying structure (see 131a). The inherent genitive noun phrase vishva samsthe bhadrataamaNDali nirNaayagaLa saaraamsha 'the gist of the decision of the security council of United Nations Organisation' is the nominal predicate of the equational sentence having the deictic subject idu 'this' (see 132a).

samapalada

↓

saaraamsha

2.3.1.6.2 Derived genitive noun phrases

Most of the genitive phrase nominal headlines have the possessor noun phrase derivable from a casual or a complement source. The derivation includes deletion of the underlying verbalizer or verb from the ending noun, which is followed by deletion of the case marker in the possessor noun and addition of genitive case marker.

Examples:

133. kiriya vaidyara ^a hooraTa _^ assam vishwasabhe

junior doctors-gen agitation

'junior doctor's agitation'

133a. kiriya vaidyaru hooraaTa (naDesidaru) nir. Assam

136. lavli lalaneya fuTbaal lav
 lovely women-gen football love
 'beautiful woman Lovely's love for football'

136a. lavli lalane (ge) fuTbaal lav (uNTaagide)
 lovely woman-dat get-pr.pf-3sn
 lavli lalaneya

137. panjaab,kaashmiira, assaam vidhanasabhe
 Punjab, Kashmir, Assam legislative assembly
 cunaavaNe ingita
 election indication
 'indication of election to Punjab, Kashmir, Assam'

137a. punjab, kaashmiira, assaam

The possessor noun phrase kiriya vaidyara 'junior doctors' is derived from the subject kiriya vaidyaru 'junior doctors' in headline 133, patrike(ya) 'of newspaper' from the object noun phrase patrikeyannu 'newspaper' in 134, samabalada 'of equal strength' from the instrumental phrase samabaladinda 'with equal strength' in 135, lavli lalaneya 'the beautiful lady Lovely's' from the dative (subject) noun phrase lavli lalanege 'to the beautiful lady Lovely' in 136 and panjaab, kaashmiira, assaam cunaavaNe(ya) 'of the election to Punjab, Kashmir and Assam' from the complement clause vidhaanasabhe(ge) cunaavaNeyannu naDesabeeku emba 'that the election should be conducted for the assembly' in 137. The possessed noun hooraaTa 'fight' becomes a verb by taking the verbalizer naDesu in headline 133, biDugaDe 'release' becomes a verb by taking the verbalizer maaDu in 134, seNasu 'fight' does not differ in form from its use as a verb in 135 and fuTbaal lav 'football love' becomes a verb by taking the verbalizer lav in 136.

phrase takes the collocative verb vyaktapaDiSu 'express' to become a full sentence. The formation of the genitive phrase headline in 137 involves subject and complement clause deletion besides the deletion of different case markers as shown in the underlying structure 137b.

In longer phrasal nominal headlines, the genitive noun phrase can be preceded by possessor noun phrase or other casual phrases, postpositional phrases, infinitive clause, past participle clause etc.

Examples:

138. indiraa kuTumbada muuvara saavu

2.3.1.7 Locative noun (phrase) + noun (phrase)

There are a good number of instances of the structure locative noun phrase + noun (phrase) being used in phrasal nominal headlines.

Examples:

143. raajyootsavadalli urdu bhaasaNa

Raajyootsava-loc Urdu speech

'Urdu speech in Raajyotsava'

143a. X(nom) raajyootsavadalli urdu (vinalli)↓

144b. X(nom) jaNTivalayadalli vijayanagara sthaavara (vannu)↓
∅↓
∅(sthaapisuttade)

establish-npst-3sn

↓
∅

In headline 143, the ending noun bhaasaNa 'speech' becomes verb by taking the verbalizer maaDu and it is preceded by two locative phrases urdu vinalli and raajyootsavada

'in Rajyothsava'. The first locative phrase urdu^{vi}nalli 'in Urdu', has become a compound with the noun bhaaSaNa 'speech' by undergoing locative case marker deletion. In headline 144, the locative phrase jaNTi valayadalli 'in joint sector' has been topicalised. The ending noun (phrase) in the original structure vijayanagara sthaavara 'Vijayanagar plant' takes the collocative verb sthaapisu 'establish' to become a complete sentence. The subject noun has been deleted.

In longer phrasal nominal headlines, the structure locative noun phrase + noun phrase can be preceded by other casual phrases, postpositional phrase, infinitive clause, or past participle clause.

Examples:

145. bhaaratada kaarige briTanninalli bhaari beeDike

 ∅ ∅ give-pst-3sn
 ↓
 ∅

154. bhraSTaacaara: mukhya mantri mane munde dharaNi
 corruption :Chief Minister house in front of demonstration
 'corruption: demonstration in front of Chief Minister's

154a. bhraSTaacaara : X (nom) mukhya mantri(ya) mane(ya) munde

dharaNi (naDesidaru)

demonstrate-pst-3pl

In headline 149, the postpositional phrase terige rahita 'without tax' functions as an attribute to the following noun bajeT 'budget', which has an underlying verb maNDiSu 'place before'. In headline 150, the postpositional phrase mahiLe meeLe 'on woman' is followed by the noun atyaacaara 'molestation', which becomes a verb by taking the verbalizer naDesu. The postpositional phrase bhayootpaadakate viruddha 'against terrorism' is followed by the noun hooraaTa 'fight', which is derivable from the verb hooraaDu 'fight' in headline 151. The postpositional phrase pi.vi.en jote 'with P.V.N' is followed by the noun shrunga sabhe 'summit', which becomes a verb by taking the verbalizer naDesu in headline 152. In headline 153, maNDala para 'in favour of Mandal' is followed by the noun tiirpu 'judgment', which takes the verbalizer niiDu to become a verb. In headline 154, the postpositional phrase mukhya mantri mane munde 'in front of the Chief Minister's house' is followed by the noun dharaNi 'demonstration,' which takes the verbalizer naDesu to become verb. The subject has been deleted in all the above headlines as shown in the respective underlying structures.

2.3.3 Complement phrase + noun

The complement phrase serves as an attribute to the following noun. This is a reduced form of the complement adjectival clause. This structure is found to occur rarely in phrasal nominal headlines.

Examples:

155. navadehali kSeetrada cunaavaNe raddu
 New Delhi constituency-gen election cancellation
 sambhava
 possibility
 'possibility of cancelling election of New Delhi constituency'

155a. navadehali kSeetrada cunaavaNe raddu (aagabahudu) (emba)
 get cancelled-inf-may compl
 (aaguva)

sambhava (ide)
 be-npst-3sn

156. tailabele matte eerike sambhava
 oil price again hike possibility
 'possibility of oil price hike again'

156a. taila bele matte eerike (aagabahudu) (emba) sambhava (ide)
 get increased-inf-may-compl be-npst-3sn.
 (aaguva)

The above headlines of the structures complement noun phrase + noun, usually serve as the subject of the existential verb iru 'be' to form sentences equivalent to that of English sentences beginning with 'there is ...'. This is shown in the underlying structures of headlines 155 and 156. The complement phrase navadehali kSeetrada cunaavaNe raddu 'cancellation of the election of New Delhi constituency' has been arrived at through the replacement of the verbalizer in its probability mood aagabahudu and the following complementizer emba by the relative participle form of the verbalizer aaguva, which is ultimately deleted (155a). Similarly, in headline 156, the complement phrase taila bele eerike 'hike in oil price' has been derived from eerike aagabahudu emba (156a).

The complement phrase + noun with the complementizer emba in between is found to be very rarely used in phrasal nominal headlines.

Examples:

157. fan varlD emba 'trishanku svarga'!

fun world compl Trishanku svarga!

'~~h~~ing heaven' called 'fun world'.

157a. X (alli) fan varlD emba (hesarina) 'trishanku svarga'

In the above headline, the complement phrase fan varlD emba

160a.X(nom) (kattariyannu) anagatya (vaagi)(haakidaru) - kattari

(aagide)-bajet
 ||
 be-pr.pf.3sn i
 ||
 (aagiruva)
 ↓ ∅

The underlying structure given under each of the above headlines and the deletion process shown therein explain how the particular headline is derived. The underlying structure also reveals how the headline reader makes out the meaning of the headline. All the above headlines are derived through the relativization process, which is followed by relative participle deletion and adverbial suffix or predicate pronominal suffix deletion. In headlines 158, 159 and 160, relative participle deletion is followed by the deletion of the adverbial suffix -aagi, which is attached to the adjective, while in 161, the predicate pronominal marker -duu attached to both the adjectives riitiya 'kinds of' and taatkaalika 'temporary' are deleted along with the discontinuous conjunction marker -uu...-uu

2.3.5 Adverb/Adverbial phrase + noun (phrase)

The structure of adverb or adverbial phrase followed by noun (phrase) has a very limited use in phrasal nominal headlines. It is derivable from an underlying sentence with a finite verb.

Examples:

162. indu meelmane cunaavaNe

today upper house election

'today is upperhouse election'

162a. indu meelmane cunaavaNe (yannu) X (nom)

(naDesuttade)

conduct-npst-3sn

163. saadhyadalle visheeSa kaaryadaLa

soon-emp special task force

'soon special task force'

163a. sadhyadallee visheeSa kaaryadaLa(vannu) X (nom)

(neemisuttade)

appoint-npst-3sn

164. vaayupaDe hosa mukhyastharaagi

air force new chief — adv

suuri

Suri

164a. vaayupaDe hosa mukhyastharaagi X (nom)

suuri(yavarannu) (neemiside)

appoint-pr.pf-3sn

The underlying verbs which make the above headlines complete sentences are naDesu 'conduct' in headline 162 and neemisu 'appoint' in headlines 163 and 164. The adverb indu 'today' in 162, and the adverbial phrases sadhyadalle 'soon' in 163 and vaayupaDe hosa mukhyastharaagi 'as new chief of air force' in 164 can be freely scrambled by placing them after the nouns also. Consider the following headline, where the adverbial phrase is used after the noun phrase.

165. raajyapaalara sammeeLana 27 rinda
governors-gen meet 27th-abl
'governors' meet is from 27th'

165a. raajyapaalara sammeeLana(vannu) 27 rinda X(nom)

(neDesuttade)

conduct-npst-3sn

The underlying verb in headline 165 is naDesu 'conduct'. In all the above headlines 162 to 165, the subject, which happens to be the noun sarkaara 'government' has been deleted.

2.4 Type 4: Compound nouns as nominal headlines

A compound noun comprises a noun which is preceded by another noun or adjective, both fused together ^{and} functioning as single unit. The preceding noun may be related to the following headnoun through different casual relationships, in which case, the compound is called tatpuruṣa samaasa meaning 'casal compounds' in traditional terms. In the case of an adjective representing a permanent quality of the following head noun, the compound is called karmadhaaraya samaasa 'adjectival compounds'. When two or more nouns in additive sense are combined together losing the additive conjunction, the resultant compound is called dvandva samaasa 'additive compound'. If two nouns of different linguistic origin form a compound, it is called ari samaasa 'hybrid compound' (for a traditional treatment of compounds ^{see} Keshiraja 1260 AD, ch.3). All these different types of compounds are found to be used in nominal headlines. Each of the above types of compound nouns and its derivational possibility are discussed in detail in this section.

2.4.1 Casal compound (tatpuruṣa samaasa)

The casual compounds are formed by deleting the case marker that links the two nouns. Besides the case marker deletion, the clauses that come in between the two nouns may also get deleted in the formation of certain compound nouns. The nominal headlines involving compound nouns of different casual relations

2.4.1.1. Subject noun + noun

Examples:

166. varmaa aayooga

Verma commission

'Verma commission'

166a. varmaa (aayoogadalli) (iddaare) - aayooga
 ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓
 ∅ i be-pr-3sh i
 ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓
 (iruva) ∅

167. mahiLaa haaki

women hockey

'women's hockey'

167a. mahiLeyaru (haaki) (aaDuttaare) - haaki
 ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓
 mahiLaa ∅ i play-npst-3pl i
 ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓
 (aaDuva) ∅

The above headlines are derived from the complete underlying sentences through relativization and relative participle deletion (166a and 167a). In the underlying sentence of headline 166, the first constituent varmaa 'Verma' is the subject and in that of 167, the subject is mahiLeyaru 'women' which becomes mahiLaa in the process of compound formation (see Sridhar 1990 : 286).

2.4.1.2 Object noun + noun

Examples:

168. gajabhikSe

elephant alms

168a. X (nom) gaja(vannu) bhikSe (niiDidaru)
 ↓ ↓ ↓
 ∅ ∅ ∅
 give-pst-3sh

169. beevu meela

 ∅ ∅ ∅ i
 grow-inf-must q
 ↓ ↓
 (beLesalu)
 ↓ ↓
 ∅ ∅
 (heeLidaru) - meela i
 ↓ ↓
 say-pst-3pl
 ↓ ↓
 (heeLida)
 ↓ ↓
 ∅ ∅

The compound noun gajabhikSe that forms headline 168 arrived at by deleting the objective case marker from the obj noun gajavannu 'elephant' and the verbalizer niiDu from the h noun bhikSe 'alms'. The compound noun beevu meela that fo headline 169 is derivable through relativization, relat participle deletion, adverbial clause of purpose deletion & accusative case marker deletion.

2.4.1.3 Instrumental noun + noun

Examples:

170. shastra cikitse
 surgical treatment
 'surgery'

170a. X(nom) shastra (dinda) Y(ge) (cikitse) (naDesidaru) -cikitse
 ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓
 ∅ ∅ ∅ ∅ ∅ ∅ ∅ ∅ ∅ ∅

 ∅ ∅

172. COD tanikhe

COD investigation

'COD investigation'

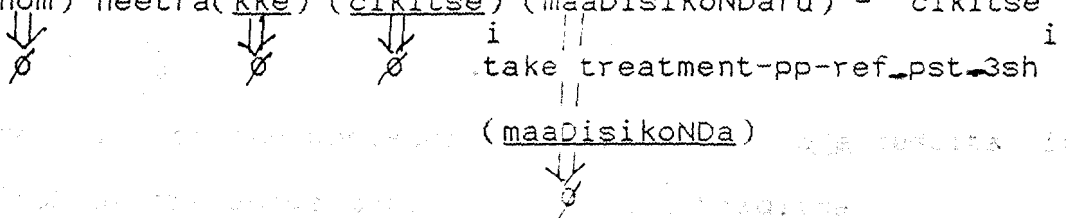

172a. COD(inda) (tanikhe) (naDesalpaTTitu) -tanikhe
 ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓ ↓
 ∅ ∅ ∅ ∅ ∅ ∅ ∅ ∅ ∅ ∅
 investigate-inf-pass-pst-3sn
 (naDesalpaTTa)
 ↓ ↓
 ∅ ∅

In headline 170, the compound shastra cikitse 'surgery' is derived by deleting the instrumental case marker -inda 'with' and the verbalizer neDesu along with the subject and dative noun deletions after relativization. In headlines 171, the derivation of the compound benki aakasmika involves deletions of the instrumental case marker -inda 'because of' and the verbalizer uNTaagu after relativization. In headline 172, the compound COD tanikhe is arrived at through the deletions of the instrumental case marker -inda 'by' denoting passive sense and the verbalizer

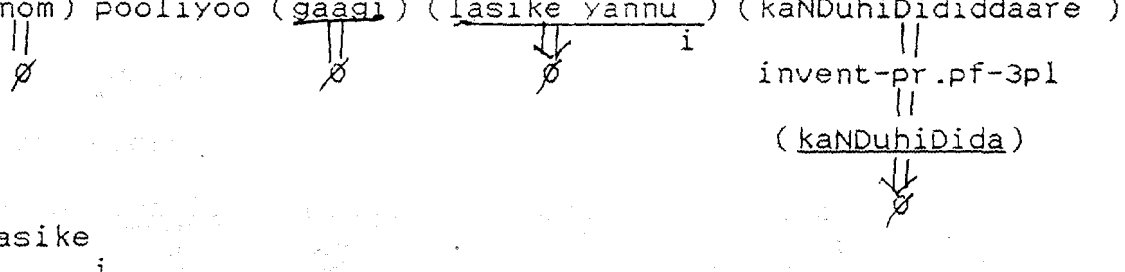

2.4.1.4 dative noun + noun

Examples:

173. neetra cikitse
 eye treatment
 'eye treatment'

173a. X (nom) neetra(kke) (cikitse) (maaDisikoNDaru) - cikitse

 i take treatment-pp-ref_pst_3sh
 (maaDisikoNDa)

174. pooliyoo lasike
 polio vaccine
 'polio vaccine'

174a.X(nom) pooliyoo (gaagi) (lasike yannu) (kaNDuhiDididdaare)

 i invent-pr.pf-3pl
 (kaNDuhiDida)
 -lasike
 i

In headline 173, the compound neetra cikitse is derived by deleting the dative marker -kke denoting benefactive sense and the verbalizer maaDisikoLLu along with the subject, *after relativization*. The compound pooliyoo lasike that forms headline 174, is arrived at through the deletions of the purposive case marker and the collocative verb kaNDuhiDi 'invent' along with the subject and object after relativization.

2.4.1.5 possessor noun + noun (genitive)

Example:

175. nirudyooga parva
 unemployment period
 'unemployment period'

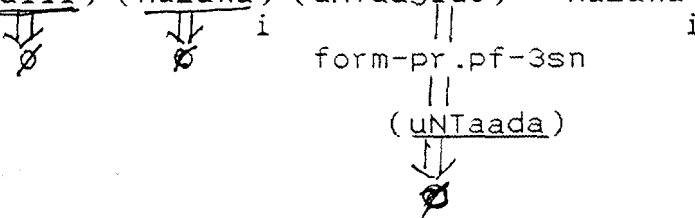

175a. nirudyooga(da) parva

The deletion of the possessive case marker -(d)a results in the formation of the above genitive compound headline.

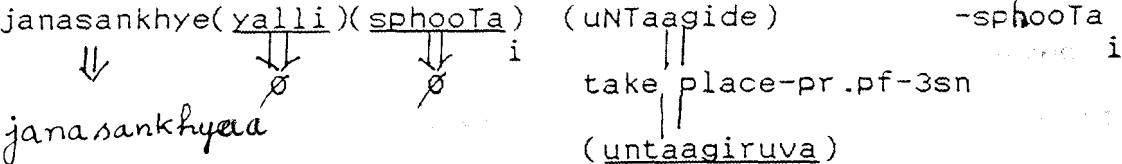

2.4.1.6 Locative noun + noun

Examples:

176. hallu huLuku
 tooth decay
 'tooth decay'

176a. hallu (inalli) (huLuku) (uNTaagide) - huLuku

177. janasankhya sphooTa
 population explosion
 'population explosion'

177a. janasankhye(yalli)(sphooTa) (uNTaagide) - sphooTa

In headline 176, the compound hallu huLuku is derived by deleting the locative case marker -(n) alli from the first element hallu 'tooth' and verbalizer uNTaagu attached to the head noun huLuku 'decay' after relativization. The compound janasankhya sphooTa in headline 177, is also arrived at through the same derivational process. The first element janasankhye 'population' becomes janasankhya in compounding.

2.4.2 Adjective + noun

The adjective + noun (karmadhaaraya samaasa) is formed by deleting the adjectival marker -aada.

Examples:

178. diTTa niluvu
bold stand
'bold stand'

178a. X (nom) diTTa (vaada) niluvu (tegedukoNDaru)
take-pp-pst-3sh

179. rakta sikta kai
blood-stained hand
'blood-stained hand'

179a. (idu) raktasikta (vaada) kai

In headline 178, the compound diTTa niluvu is formed by deleting adjectival marker -(v)aada along with verbalizer tegedukoLLu attached to the head noun and the subject.

In headline 179, the compound rakta sikta kai is the predicate of an

deletion of adjectival marker -(v)aada and the deictic subject idu.

2.4.3 Co-ordinate compound (dvandva samaasa)

The co-ordinate compound is formed by deleting the additive conjunction mattu connecting the two nouns.

Example:

180. saavu noovu - naasha vinaasha
 death - pain - destruction - annihilation
 'death and pain - destruction and annihilation'

180a. X (uurinalli) saavu (mattu) noovu - naasha (mattu) vinaasha

(uNTaayitu)

happen-pst-3sn

In the above headline, the compounds saavu noovu and naasha vinaasha have undergone the deletion of the additive conjunction mattu along with the verbalizer uNTaagu.

2.4.4 Hybrid compound (ari samaasa)

The hybrid compound is formed by taking the first element from one language and the second element from another language. It overlaps with any of the three types of compounds dealt with above.

181. sankSipta skooru

brief score

181a. (idu) sankSipta (vaada) skooru

this

The compound in the above headline is an adjectival compound and still, it is called as hybrid compound as it consists of elements from two different languages (the adjective sankSipta 'brief' is from 'Sanskrit' and the head noun skooru 'score' is from English). The above compound is the predicate of the underlying equational sentence with the deictic subject idu 'this' and it is derived by deleting the adjectival marker -aada and the deictic subject.

2.5 Type 5 : Simple nouns as nominal headlines

The simple noun used as a nominal headline is otherwise called a 'label'. Its use is related to themes like 'success', 'defeat', 'arrest', 'strike', 'appointment', 'criticism', 'permission', 'grant', 'educational attainment' such as obtaining Ph.D, 'welcoming', 'thanking' etc., and it is derivable from sentences just as the other types of nominal headlines.

Examples:

191a. dharaNi

demonstration

'demonstration'

191a. X (nom) dharaNi (naDesidaru)

demonstrate-pst-3pl

The above mentioned simple noun headlines (182 to 191) are

derived from their complete underlying sentences respectively

(182a to 191a). The noun soolu that forms headline 182 has the

same form in its verbal function. The past tense form of the

verb has been replaced by the nominal form soolu and the subject

has been deleted (see 182a), in order to derive headline 182.

In headlines 183, 185 and 190, the simple noun headlines are

the result of the deletion of verbalizer -isu along with subject

and object. The headline 184 is derived by deleting the

collocative verb arpisu 'offer' along with the objective case

marker attached to the noun kritagnate and the subject and

indirect object nouns. Headline 188 is the result of deletion of

verb, subject, object and complementizer emba. Headline 187 is the result of deletion of subject and verbalizer hondu. Headline 191 is derived by deleting verbalizer naDesu along with the subject. Headlines 188 and 189 have undergone deletion of verbalizer niiDu along with subject and indirect object.

The nominal category and its different structural types viz., the sentential, the clausal, the phrasal, the compound noun and the simple noun, constitute the vast majority of the headlines. The nominal headlines are marked by the absence of the verbs in any of the following five forms; (i) finite verb, (ii) imperative (direct and indirect) verb, (iii) defective verb, (iv) modal verb and (v) negative verb (with the exception of nominal negation used in ^{ten}sentential nominal headlines). The nonfinite forms of verbs such as relative participle, infinitive, past participle and the conditional participle form the clausal type of nominal headlines in Kannada, whereas such nonfinite forms of verbs used as verbal subordinate clauses form part of the verbal headlines in English (see Simon - vandenbergen, 1981: 203 - 213 for English).

'Brevity' is the distinctive characteristic of the nominal headlines. This is achieved through the different nominalization and deletion processes, which have been explicitly shown in the underlying structures given under the headlines wherever such processes are involved. Besides the usual nominalization processes in the language such as relativization, complementation, gerundial noun formation, derivation from the

pronominalization of possessive predicate, deletion of the collocative verbalizer or verb is used as a prevalent nominalization process especially in the newspaper language.

Nominalization through relativization results in clausal nominal headlines involving relative clause as depicted by the headlines given in section 2.2.1.1. It involves deletion of the casual noun phrases like subject, object, instrumental, dative and locative in the constituent sentence. Though the deleted noun phrases are coreferential to the headnoun (phrase), the casual relationships are not explicit and they need to be recovered. Participial noun formation, which follows relativization, results in fusing together the relative participle and the proform of the indefinite headnoun (phrase) and it is used rarely in nominal headlines (see headline 44). Complementation gives rise to nominal headlines involving complement clause, which is characterised by the deletion of the complementizer 'emba' 'that' (see 2.2.1.2. headlines 56 and 57).

Gerundial noun is not found to be used as an ending noun phrase of the nominal headline, but it forms part of the different structural types. It appears in the underlying structure of some of the headlines and gets deleted (for example, see headline 36). Genitivization is the most predominantly used nominalization process in nominal headlines. It forms an independent structural type of genitive phrase nominal headlines (2.3.1.6) as well as forms a part of the different types of headlines. It includes deletion of different case markers and verbalizer or verb (2.3.1.6.2). Pronominalization of possessive predicate is found used specifically in sentential nominal

Language in India 7 : 10 October 2007 Language of Kannada Dailies M. N. Leelavathi, Ph.D. 107

headlines involving a pronoun as complement (see headlines 17 and 32). The use of the derived nouns (from verb) at the end of the nominal headlines is prevalent in clausal nominal headlines, especially those involving past participle (see headlines 77, 78 and 79). Deletion of verb or verbalizer though forms a part of the derivation of different types of nominal headlines other than sentential, its use is typical in the derivation of clausal nominal headlines involving infinitive, past participle and conditional participle. It is followed by deletion of different casual noun phrases such as subject, object, instrumental, dative and locative (see 2.2.2, 2.2.3 and 2.2.4).

Besides the deletions associated with the different nominalization processes as described above, there are certain other deletion processes specific to the sentential, infinitive clause and compound noun types of nominal headlines. Sentential nominal headlines are characterized with the deletion of copula in its stative and inchoative interpretations (2.1). The deletion of the stative copula (aagi...iru/ aagiru 'be') is in line with its optional use in the language while the inchoative copula (aagu 'become') deletion marks one of the distinctive features of the newspaper language. The deletion of the quotative particle endu 'that' is involved in the derivation of the infinitive clausal nominal headlines. The compound nouns used as nominal headlines involve relative participle deletion (for example, headlines 166 and 167), adjectival suffix -aada deletion (see headline 178 and 179) and additive conjunction mattu 'and' deletion (see headline 180) .

phrases and the accusative case marker from certain object noun phrases are in line with their optional uses in the language. The deletion of the plural marker -gaLu from the neuter noun (see headline 4) and the human honorific marker -aru from certain nouns (see headline 5 and 8) reflect on the preference for the popular and informal style in newspaper language. The performative subject deletion is quite common among several headlines and where the performative subject is given, the performative verb is usually deleted.

The deletion of finite forms of verbs or verbalizers along with their markers of tense, aspect, voice, mood and agreement has a determining role in the derivation of the nominal headlines. The deleted verbs and verbalizers being very limited in number (-isu, paDisu, maaDu, niiDu, naDesu, haaku and kaigoLLu are the frequent verbalizers deleted and iru, 'be' baa 'come', biiLu 'fall', 'uNTaagu' 'happen' hoogu 'go', vyaktapaDisu 'express', maNDisu 'place before' and neemisu 'appoint' are the frequent verbs deleted). The reader is expected to recover them with the help of the collocative nouns given in the end of the headline. The tense to be recovered is limited to the present and past indefinite, aspect to the present perfect, voice to the active (rarely impersonal or personal passive), mood to the obligatory and probability and agreement to the third person neuter singular and human honorific singular. The reader has to recover them from the linguistic context provided in the headline. The deletion of the functional elements such as case marker, complementizer, quotative particle and conjunction do not deter the reader from understanding the content of the headline.

In recovering the subject and other casual noun phrases, besides the linguistic context of the headline, the reader's familiarity with the subject matter, his knowledge of the facts and information provided by the newspaper on previous days - all play a vital role.

The clausal nominal headlines involving relative clause or complement clause, the phrasal nominal headlines and the nominal headlines involving compound noun and simple noun function almost like a label as they announce only the 'topic' and leave the 'modality' unexpressed. On the other hand, the sentential nominal headlines and the clausal nominal headlines involving the infinitive, past participle or conditional participle announce the 'modality' and leave the 'topic' unexpressed or partially expressed (Simon - Vanderbergen 1981: 208). The reader is thus stimulated with the eagerness to go to the news story and the indexing function of the nominal headlines is fulfilled in this manner.

Topicalization, which is frequently used in sentential nominal headlines involving nominal complements, is an effective means of attracting the reader towards the essential information.

The nominal headlines, on the whole, are attributed with the quality of brevity and attractiveness. However, they demand an effort from the part of the reader, who has to make a number of decisions in the process of comprehending the message.
