Language of Kannada Dailies M. N. Leelavathi, Ph.D.

CHAPTER 9

CONCLUSION

The study on 'Language of Headlines in Kannada Dailies' has been reported in the preceding eight chapters. The importance of the study in general, the functions of newspaper headlines, the different linguistic and typographical aspects involved in headlines, definitions of headlines, earlier studies on the language of headlines and the method adopted for the present study have been dealt with in chapter 1. The nominal category of headlines, its structural types and subtypes and the derivational processes involved in arriving at the different types and subtypes have been discussed in chapter 2. In chapter 3, the verbal category of headlines and its structural possibilities at morphological and syntactic levels have been dealt with. In chapter 4, the syntactic and semantic relationships that link the decks of the multideck headlines have been brought out. The morphological and syntactic deletions involved in the use of punctuation marks in headlines have been explained in chapter 5. The semantic-communicative effects behind the use of rhetoric expressions in headlines have been made explicit in chapter 6. In chapter 7, a detailed comparison has been made on the linguistic and typographical aspects of the headlines of the three dailies, Kannada Prabha, Prajavani and Samyukta Karnataka. In chapter 8, certain headlines which lack clarity and readability due to unscrupulous lexical and structural choices and inaccurate use of punctuation marks have been identified from all the three dailies and necessary guidelines for improving such headlines have been suggested.

The linguistic analysis of the headlines of Kannada dailies undertaken in this study reveals that the variety of language used in headlines is a derivative of the standard written Kannada and it is worthy to be considered as a functional variety as it correlates with different functions of headlines as well as certain contextual factors. This is supported by the fact that the nominal headlines, which constitute the vast majority, are all derived from underlying sentences through different nominalization processes and the contingent deletions of different functional items and content expressions (see chapter 2 Nominal headlines). Besides the nominalization and deletion processes commonly used in the written language, the headline language involves nominalization through simple deletion of verbs and verbalizers from their corresponding collocative nouns, which marks the headline language as a distinctive variety (see section 2.2 clausal nominal headlines). The verbal headlines are also derived and distinctive from the written language in the sense that they involve subject deletion widely (see chapter 3, Verbal headlines). Sometimes, it is found that the headline language is relieved of the extreme formalism of the written language, as for instance through the avoidance of honorific singular marker -aru from the predicate nominals such as naaTakakaara 'play-wright' (see example 8 in 2.1). The influence of spoken language is rarely reflected in the instances of deleting the neuter plural marker -gaLu from the neuter nouns (see example 4 in section 2.1) and using the truncated form of the first person singular

agreement marker -e < enu (see example 7 in chapter 3) and the third person masculine singular agreement marker -a < -anu (see examples 20, 27 and 28 in chapter 3). The headline language is, however, found closer to the written language in terms of the complexity of structures used in headlines. This is reflected in the longer headlines involving different combinations of phrases and clauses, exemplified under each subtype of nominal headlines and verbal headlines (see chapters 2 and 3). The different types and subtypes of nominal and verbal headlines, which are made very precise through the deletion of different expressions, correlate with the summarizing and indexing functions of the headlines and the broad contextual factor that the medium is writing.

The rhetoric expressions such as personification, simile, metaphor, pun, rhyme, etc., used in headlines are related to the function of 'attracting' the readers (see chapter 6). The use of topicalization, which involves reordering of words and phrases, also adds attraction to the headlines.

The deletion processes involved in the use of multidecks (see chapter 5) make the headlines very precise and they correlate with the contextual factor of limited space allotted in the newspaper for the headlines. The total absence ^{in structural types of nominal headlines} in headline language of certain explicit clausal structures such as correlative relative clauses involving the discontinuous sequence of interrogative and demonstrative bases (yaa-...a-...) (for details see Nadkarni, 1970; Subbakrishna, 1981), complement adjectival clauses with the complementizer aaguva / emba, adverbial clause of time with the structure relative participle +

reason with the structure gerundial noun + instrumental case marker -inda, adverbial clause of manner with the structure relative participle + haage, adverbial clause of purpose with the quotative particle endu/ante, quotative clause with the above quotative particles, etc., is also closely related to the factor of limited space. ~~When line goes with the language used in the~~ The prevalent use of present and past tenses in verbal headlines, the rare use of adverbs of time and the loss of markers of tense, aspect, or mood due to nominalization in nominal headlines are all related to the contextual factor, time of the event reported. Since the presupposition is that the 'time' of the event is 'recent past' or the 'previous day', the loss of markers of tense, aspect, or mood does not lead to confusion. ~~Therefore~~ There is no direct communication relationship between the headline writer and the reading public. This is reflected in the predominant use of declarative statements in headlines and the absence of the first and second person pronouns except in quoted statements (see chapter 3). ~~The headline language, which involves extensive deletions of~~ The headline language, which involves extensive deletions of expressions, is largely based on the presupposition that the headline reader will be able to draw upon previous information on the situation in order to interpret the implications of the headline correctly. ~~It is clear from the above discussion that the derivative nature of headline language attributed with linguistic features interacting with functional and contextual factors makes it a functional variety. This is in confirmation of the observation made by Sapir (1924) that the headline language is a 'language~~ It is clear from the above discussion that the derivative nature of headline language attributed with linguistic features interacting with functional and contextual factors makes it a functional variety. This is in confirmation of the observation made by Sapir (1924) that the headline language is a 'language

Language in India 7 : 10 October 2007 Language of Kannada Dailies M. N. Leelavathi, Ph.D. 297

only in a derived sense' (p.36) and also the inference arrived at by Simon-Vandenberg (1981) through the study of headlines of The Times that the headline language is a 'functional variety'.

From the comparative study of the headlines among the three Kannada dailies (chapter 7), it is revealed that the chief difference among them lies not with the language used but with the mode of selecting the message, the quantum of the message used in the headlines and the typographical aspects such as page lay-out, coloumn length and the type size used. There is no need to emphasize that the typographical aspects are closely related to the eye-catching and attracting function of the headlines and also they serve effectively in conveying the significance and seriousness of the message. The degree of importance attached to a particular message is found to vary among the three dailies. It is also found that Kannada Prabha has attached importance to the brevity of the headline while Prajavani and Samyukta Karnataka have considered the informativeness (quantum of message) of the headline more important. These observations are, however, inadequate to make any comparative assessment of the three dailies.

In spite of the fact that the three dailies have exhibited a higher degree of importance to the accuracy of headlines, a few headlines involving inaccuracy in terms of the use of structures, vocabulary and punctuation marks have been located and it is suggested that space saving should not be at the cost of accuracy, clarity and readability (see chapter 8).

To conclude, the newspaper headlines is a rich field of inquiry and there is enough scope for studying it from

psychological and sociological dimensions besides the linguistic dimension. A semantic and stylistic study of the lexical choice involved in headlines, an experimental study of the readability and comprehensibility of headlines from the readers' point of view and the linguistic variations across different themes are a few areas worthy to be considered for future research.

66. raamangaradalli 102 manegaLannu nirmisalu yoojane
 Ramanagara-loc 102 houses-acc construct-inf scheme
 'scheme to construct 102 houses in Ramanagara'

mandira nirmaNakke aagrahisi, 'pressurizing for the construction of temple' in headline 74, keendrada manavi tiraskarisi 'rejecting the centre's appeal' in headline 75 and vimaananildaaNa shulka eerike prashnisi 'questioning the entry fee hike' in headline 76, serve as the adverbial clauses of circumstance to the following main clauses represented by the verbalizer taking nouns meravaNige (naDesu), tiirpu (niiDu) and riT arji (haaku) respectively.

In all the three headlines above, the subject of the adverbial clause and main clause is the same as referred by the notation X in the underlying structures. The deleted subjects are recoverable from the news story. In headline 76, the postpositional phrase Y meele 'on Y' has been deleted. This is recoverable from the linguistic context of the headline as Y refers to the civil aviation authorities.

2.2.3.2

Past participle clause (adverbial clause of manner) + noun

The past participle clause is used more frequently as the adverbial clause of manner in clausal nominal headline.

Examples:

77. nyaayaalayadallee iridu kole
 court-loc-emp stab-pp murder
 'murder stabbing in the court itself'

The past participle clauses, nyaayaalayadalle iridu 'stabbing in the court itself' in headline 77, meravaNigeyalli kusidu biddu 'having collapsed in the procession' in 78 and kanigaa neravilladeyee 'without the help of KaNiga' in 79 are the adverbial clauses of manner modifying the verbs kol, saayu and hooraaDu respectively, from which the ending nouns have been derived.

In all the three headlines above, the adverbial clause and main clause share a coreferential noun as shown in the corresponding underlying structures. The coreferential noun is a subject in both the adverbial clause and the main clause in headlines 77 and 78 and in headline 79, it is dative in the adverbial clause and subject in the main clause. The deleted nouns are recoverable from the news story.

2.2.3.3 Past participle clause (adverbial clause of reason)+ noun

The past participle clause is frequently used as the adverbial clause of reason in clausal nominal headlines.

Examples:

80. saikalninda biddu saavu

bicycle-abl fall-pp death

'death falling from bicycle'

80a. X (nom) saikalninda

biddaru

i ↓
↓
∅

fall-pst-3sh

biddu

X (nom) sattaru

 ↓
 ∅
 die-pst-3sh
 ↓
 saavu

81. karaDi kacci gaaya
 bear bite-pp wound
 'wound, bitten by bear'

81a. karaDi X (annu) kaccitu
 i
 ↓
 ∅
 bite-pst.3sn
 ↓
 kacci

X (ge) gaaya (uNTaayitu)
 i
 ↓
 ∅
 get hurt-pst-3sn
 ↓
 ∅

In headline 80, the ending noun saavu 'death' is derived from the verb saayu 'die'. In headline 81, the ending noun gaaya could become a verb by taking the collocative verbalizer uNTaagu (gaaya uNTaagu) 'get hurt'. The past participle clauses, saikalninda biddu 'having fallen down from the cycle' in headline 80 and karaDi kacci 'the bear having bitten' in headline 81 are the adverbial clauses of reason, which modify the respective main clauses represented by the verb saayu, from which the noun saavu is derived and gaaya uNTaagu, which is derived from the noun gaaya. The adverbial clause and the main clause in both the headlines share a coreferential noun as revealed by the underlying structures. In headline 80, the coreferential noun is a subject in both the clauses and in headline 81, the coreferential noun is the object in the adverbial clause and the

dative in the main clause. The deleted nouns are recoverable from the news story.

Of the different alternative structures available in Kannada to express the adverbial clauses of manner and reason (see Sridhar, 1990:71,74), it is the past participle clause structure which is the most precise one and hence it is preferred in newspaper headlines. The adverbial clause of circumstance is usually expressed through the past participle structure only.

2.2.4. Conditional participle

The conditional participle is formed by adding the conditional suffix -are to the past stem of the verb (e.g., maaDid + are = maaDidare). The negative conditional participle is formed by adding -are to the negative past participle stem + past stem of the verb iru (e.g., maaDade + idd + are = maaDadeiddare). The conditional participle, affirmative or negative, along with its preceding clausal constituent(s) constitutes the adverbial clause of condition. The adverbial clause of condition is usually followed by a verb. But, in clausal nominal headlines, it is followed by a noun which could be derived from a verb or become a verb by taking a collocative verbalizer.

82. kaarininda iLidare kole
car-abl alight-cond murder

'murder, if (someone)alighted from the car'

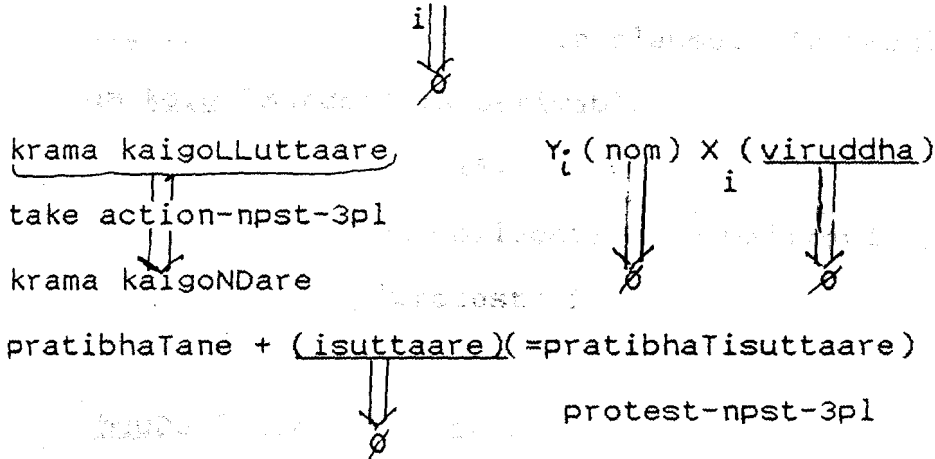

82a. X (nom) kaarininda iLiyuttaare X (annu)
i ↓ alight-npst-3sh i ↓

83a. karikallu saagaNe : X (nom)

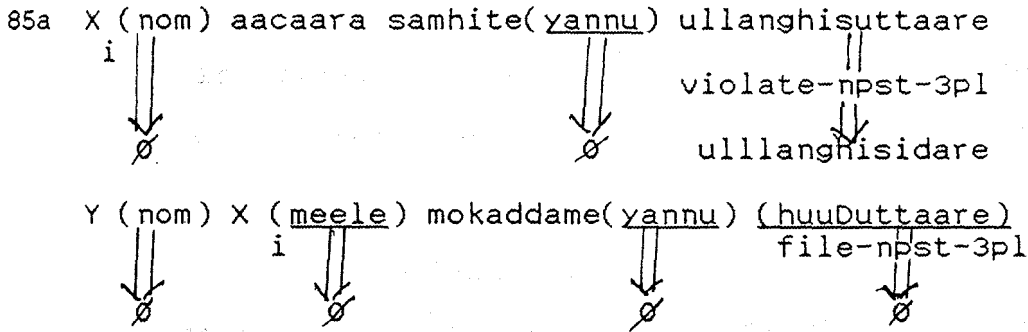

84. kaaveeri : ityartha aagadiddare bikkaTTu : gavDa
 Cauvery : settle become-neg.cond trouble : Gowda
 'trouble, if Cauvery issue is not settled : Gowda'

84a. kaaveeri : X (nom) ityartha aaguvudilla

X (ninda) Y (ge) bikkaTTu (unTaaguttade) : gavDa
 i arise-npst-3sn

85. aacaara samhite ullanghisidare mokaddame
 code of conduct violate-cond suit

In the above headlines, the ending noun is realized as a verb and it solely represents the main clause. In headline 82, the ending noun kole 'murder' is derivable from the verb kol 'murder'. In headlines 83, 84 and 85, the ending nouns become verbs by taking different collocative verbalizers (pratibhaTane + isu = pratibhaTisu 'protest' in 83, bikkaTTu + unTaagu = bikkaTTuNTaggu 'trouble arise' in 84 and mokaddame + huuD = mokaddame huuD 'file suit' in 85). The conditional participle clauses, kaarininda iLidare 'if alighted from the car' in 82, krama kaigoNDare 'if action taken' in 83, ityartha aagadiddare 'if not resolved' in 84 and aacaara samhite ullanghisidare 'if code of conduct is violated' in 85, serve as conditions for the events specified in the main clauses that follow. In all the above headlines, the conditional clause and the main clause share a coreferential noun, as revealed in the underlying structures. The coreferential noun in headline 82, is a subject in the conditional clause and an object in the main clause. In headline 83, it is a subject in the conditional clause and a postpositional phrase in the main clause. In 84, it is a subject in the conditional clause and an ablative in the main clause. In 85, it is a subject in the conditional clause and a postpositional

phrase' in the main clause. In the main clauses of all the headlines, another casual constituent Y is involved, which is not shared by the corresponding conditional clauses. Y is a subject in the main clauses of headlines 82, 83 and 85 and a dative (benefactive) in headline 84. The deleted nouns are recoverable from the news story.

2.3 Type 3: Phrasal nominal headlines

A phrasal nominal headline consists of a noun(phrase) preceded by any one of the following five constituents : (i) a casual noun(phrase), (ii) a postpositional noun phrase, (iii) a complement noun phrase, (iv) an adjective or adjectival phrase and (v) an adverb or adverbial phrase. The ending noun(phrase) of the five different structural compositions specified above can be a casual or post positional one, which could be followed by a collocative verb, or a noun which could become a verb by taking a collocative verbalizer or which could be directly derived from a verb. The use of these different structural compositions in phrasal nominal headlines is discussed in detail in this section.

2.3.1 Casal noun(phrase) + noun(phrase).

The casual noun(phrase) that begins a phrasal nominal headline can be subject, object, instrumental, dative, ablative, genitive, or locative. The order of frequency in which these casual relations are found to occur in phrasal nominal headlines is as follows: genitive > subject > object > dative > locative > instrumental > ablative.

2.3.1.1 Subject noun (phrase) + noun(phrase)

The subject noun(phrase) is more frequently used (next to genitive) by way of beginning the phrasal nominal headlines.

Examples:

86. deevi-bhajan haNaahaNi

Devi-Bhajan fight

'Devilal and Bhajanlal fought'

86a. deevilaal-bhajanlaal haNaahaNi(naDesidaru)

fight-pst-3pl

87. vilaanDer hindegeta

Vilander flinch

'Vilander flinched'

87a. vilaanDer hindegedaru

flinch-pst-3sh

hindegeta

88. raajya graamiiNa byaank naSTadalli

state rural bank loss-loc

'state rural bank is at loss'

88a. raajya graamiiNa byaank naSTadalli (ide)

be-npst-3sn

89. kaaveeriya kaNNU guDaarada meeLe

Cauvery-gen eye tent-gen on

'Cauvery's eye is on the tents'

89a. kaaveeriya kaNNU guDaarada meele (biddide)
 fall-pr.pf-3sn
 ↓
 ∅

90. aaljiiriya neravige maars taalme aaTa
 Algeria favour-dat Marsh patient play
 'Marsh played patiently to the favour of Algeria'

90a. maars taalme aaTa aaljiiriya neravige (banditu)
 come in favour-pst-3sn
 ↓
 ∅

The underlying structure given under each of the headlines reveals how the ending noun(phrase) is realized as a verbal predicate through different means. In headline 86, the ending noun haNaahaNi 'fight' becomes a verb by taking the verbalizer naDesu giving the meaning 'fight' and thus serves as the predicate of the subject noun phrase deevi-bhajan 'Devilal and Bhajanlal'. In headline 87, the ending noun hindegeta 'flinch' is derivable from the corresponding verb hindege 'flinch' and it serves as the predicate of the subject vilaanDer 'Vilander'. The ending casal noun phrase naSTadalli 'at loss' in headline 88, remains a locative constituent and takes the collocative existential verb iru 'be', which becomes the predicate of the subject phrase raajya graamiina byaank 'state rural bank'. In headline 89, the ending postpositional phrase guDaarada meele 'on the tents' is followed by the verb biiLu 'fall' which becomes the predicate of the subject noun phrase kaaveeriya kaNNU 'Cauvery's eye'. In headline 90, the ending dative casal noun phrase aaljiiriya neravige 'to the favour of Algeria' has been topicalised and in its original structure, it takes the verb baa 'come',

which becomes the predicate of the subject noun phrase maars
taaLme aaTa 'Marsh's patient play'.

The phrasal nominal headlines of the structure subject
noun(phrase) + noun(phrase) are also found to be preceded by
other casual phrases, postpositional phrases, infinitive clause,
past participle clause and conditional clause.

Examples:

91. ajitaabge 80 saavira pavND parihaarakke

Ajithab-dat 80 thousand pounds compensation-dat

koorT tiirpu

court judgment

'court pronounced judgment for 80 thousand pounds

↓ ↓
die-pst-3sk
saavu

In the above headline the subject noun vyakti 'person' is modified by the relative clause nyaayaangavashadallidha 'one who was in judicial custody'.

2.3.1.2 Object noun (phrase) + noun (phrase)

The structure object noun (phrase) + noun (phrase) is frequently used in phrasal nominal headlines, especially in contexts where the subject is unspecific or suppressed.

Examples:

97. parihaara manjuuru

relief sanction

'relief sanctioned'

97a. X (nom) parihaara (vannu) manjuuru(maadide)

99. singapurada mihiLaa niyatakaalika

Singapore-gen women periodical

prakaTaNe sthagita

publication stop

'Singapore women's periodical publication stopped'

corresponding verb munduuDu 'postpone'. The objective case marker -annu, which is optional in the language with the inanimate nouns, has been deleted from all the object nouns in the above headlines. The subject, which refers to sarkaara 'government' (state or central) in all the cases, has also been deleted.

In phrasal headlines of the structure object noun (phrase)+noun (phrase) can be preceded by other casual noun phrases, postpositional phrases and different adverbial phrases and clauses.

Examples:

102. ajit singge daLa nooTiis jaari

The object noun(phrase) + noun phrase construction, nootiis

jaari 'notice issual' is preceded by the subject noun dala

'Janata Dal' and the dative (benefactive) noun ajit singge

'to Ajit Singh' in headline 102, kaniSTa 12 sthaana niriikSe

'at least 12 seats expectation' is preceded by the dative

benefactive noun phrase bhajapaakke 'to BJP' and the locative

phrase raajyadalli 'in the state' in headline 103, muutra piNDa

kaNNU daana 'kidney, eyes donation' is preceded by the

instrumental noun phrase (passive voice) suTTusaayuttidda

mahileYinda 'by the woman who was dying due to burns', which is

subject in the underlying active voice structure (see 104 a) in

headline 104, citaabhasma visarjane 'funeral pile ashes

sprinkling' is preceded by the postpositional phrase nimaarayada

meele 'over the Himalayas' in headline 105, pancagaTTi neemaka 'Panchagatti appointment' is preceded by the adverbial phrase bhuuseenaa nigamada nirdeeshakaraagi 'as land army director' in headline 106, bas dara eerike 'bus fare hike' is preceded by the adverbial clause of time (successive) pratipakSada salahe keeLida nantara 'after hearing suggestion from the opposition party' in headline 107, anumati niraakaraNe 'permission denial' is preceded by the infinitival adverbial clause of purpose kiyooniks ghaTaka muccalu 'to close Keonics unit' in headline 108, kaDalee-kaayi muuTe darooDe 'groundnut bag robbery' is preceded by the past participle adverbial clause of manner manege nuggi 'having sneaked into the house' in headline 109 and 10 lakSa ruu bahumaana '10 lakh rupees reward' is preceded by the conditional adverbial clause raajiiv hantakara suLihu niiDidare 'if information regarding the whereabouts of Rajiv's assassins is given' in headline 110.

2.3.1.3 Instrumental noun (phrase) + noun (phrase)

The instrumental noun(phrase) + noun (phrase) structure is rarely used in phrasal nominal headlines where the instrumental noun phrase is used in the sense of cause or medium.

Examples:

111. gambhiira surakSataa lopadinda duranta
 serious security lapse-ins: tragedy
 'tragedy due to serious security lapse'

111a. gambhiira surakSataa loopadinda duranta (unTaayitu)

113a. sandeesh naagaraajavarinda spaSTane (niiDalpaTTitu)

clarify-pass-pst-3sn

113b. sandeesh naagaraaj spaSTane (niiDidaru)

clarify-pst-3sh

114. lester pigeT avarinda savaari

Lester piget-ins riding

'riding by Lester piget'

114a. lester pigeT avarinda savaari (maaDalpaTTitu)

ride-pass-pst-3sn

114b. lester pigeT savaari (maaDidaru)

ride-pst-3sh

In headline 113, the ending noun spaSTane 'clarification' becomes a verb by taking the verbalizer niiDu in its passive form and it is an object in the underlying active sentence. The preceding instrumental noun phrase is the result of passivization and it is a subject in the underlying active sentence as shown in the underlying structure 113 b. Similarly in headline 114, the ending noun savaari 'ride' becomes a verb by taking the verbalizer maaDu in its passive form and it is an object in the underlying active sentence. The preceding instrumental noun phrase is the result of passivization and it is a subject in the

underlying active sentence as shown in the underlying structure

114b.

The structure, instrumental noun (phrase) + noun(phrase) can be preceded by other casual phrases, postpositional phrases and past participle adverbial clause.

Examples:

115. aadaaya sangrahaNege railve
fund collection-dat railway
khaateyinda jaagatika baAND
department-ins universal bond
'universal bond by the railway department for fund
collection'

115a. aadaaya sangrahaNege railve

release-pst-3sn

116. mangaLuuru paalikaa mukhyaadhikaariya mele
Mangalore corporation chief officer -gen on
kaanTraakTarinda halle
contractor-ins attack

'attack by a contractor on the chief officer of Mangalore'

paalika mukhyaadhikaariya meele 'on the chief officer of Mangalore corporation' in headline 116 and patniyinda arji 'petition by wife' is preceded by the past participle adverbial clause of manner meelmane spardhige jiivanaamsha koori 'requesting for the subsistence allowance from upper house candidate' in headline 117.

2.3.1.4 Dative noun(phrase) + noun(phrase)

The use of dative noun(phrase) + noun phrase structure is quite frequent in phrasal nominal headlines. The dative is used in benefactive, purposive and allative meanings.

Examples:

118. deevadaasiyarige maduve

devadasis-dat marriage

'marriage to devadasis (courtesans)'

118a. deevadaasiyarige X(nom) maduve (maaDisabeeku)
 ↓ ↓
 perform-inf-must

119. jaati paddatigaLa nirmuulanege kare

caste systems-gen eradication-dat call

'call for eradication of caste system'

119a. jaatipaddatigaLa nirmuulanegaagi X(nom) kare (niDidaru)
 ↓ ↓ ↓
 nirmuulanege call pst-3sh

120. kaangai pakSakke perumaal

Cong-I party-dat Perumal

'Perumal to congress-I party'

120a. perumaal kaangai pakSakke

120b. perumaal kaangai pakSakke (pakSaantarisidaru)

defect-pst-3sh

The ending noun maduve 'marriage' in headline 118, takes the verbalizer maaDisu and becomes a verb. The dative noun phrase deevadaasiyarige 'to devadasis' is used in the benefactive sense. In headline 119, the ending noun kare 'call' becomes a verb by taking the verbalizer niiDu and the dative noun phrase jaatipaddatigaLa nirmuulanene 'for eradication of caste system' is used in the purposive sense. In headline 120, the ending subject noun perumaal 'Perumal' has been topicalised (cf. 120a). The dative noun phrase kaangai pakSakke 'to congress-I party', which comes at the end in the original structure, becomes a verb by taking the collocative verb pakSaantara maaDu 'defect'. The dative here is used in the allative sense. In headline 118, the subject NP and the performative clause have been deleted and in headline 119, the performative subject has been deleted.

The structure dative noun(phrase) + noun(phrase) can be preceded by another dative or other casual phrases, postpositional phrase, infinitival clause, past participle clause, conditional clause or concessive clause.

Examples:

121. sooniyaage pradhaani sthaanakke

Sonia-dat Prime Ministership-dat

yatna : Tiike

'effort for Prime Ministership to Sonia Gandhi:
criticism'

121a. sooniyaage pradhaani sthanakk^a(^eaagi) X (nom)

hair-dat jasmine flower

'eventhough there is no food for stomach (someone desires)

jasmine flower for the plaited hair'

127a. hoTTege hiTTilladiddaruu juTTige mallige huu (beeku)

want

The dative noun phrase + noun, pradhaani sthaanakk

benefactive phrase sooniyaage 'to Sonia' in headline 121, siimee-eNNege paradaaTa 'running about for kerosene' is preceded by the locative phrase haveeriyalli 'in Haveri' in 122, bhaاراتakke geluvu 'victory to India' is preceded by the infinitive adverbial clause of reason hridayavantike beLasikoLLalu 'to develop humaneness' in 124, 5 janarige gaaya 'injury to five persons' is preceded by the past participle adverbial clause of manner mane kusidu 'house having collapsed' in 125, bhaajapa cunaavaNege siddha 'BJP is ready for election' is preceded by conditional participle clause raav sarkaara uruLidare 'if Rao's government falls' in 126, juTTige mallige huu 'jasmine to plaited hair' is preceded by the adverbial clause of concession hoTTige hiTTilladiddaruu 'eventhough there is no food for stomach' in 127.

2.3.1.5 Ablative noun(phrase) + noun (phrase)

The ablative noun(phrase) + noun(phrase) structure is found to be sparingly used in phrasal nominal headlines. The ablative is used in the sense of 'source'.

Examples:

128. jailninda paraari

jail-abl escape

'escaped from the jail'

128a. X (nom) jailninda paraari (yaadaru)

↓
Ø

escape-pst-3sh
↓
Ø

In the above headline, the ending noun paraari 'escape' becomes a verb by taking the verbalizer aagu and the preceding ablative noun phrase jailninda 'from the jail' is used in the

54. suDuva biidi, sigareT, paan
 burn-npst.rp beedi, cigarette, pan
 'the beedi, cigarette and pan which burns (the pocket)'

55. tukkuhiDida pakSaagaLu
 rust get-pst.rp parties
 'the parties which got rusted'

In headline 53, the head noun kaaveeri refers to the name of the river. The relative clause that precedes the headnoun munidu maariyaada 'who became furious' refers to an action which does not pertain to inanimate objects. The river Cauvery, which is an inanimate noun, has been personified through the relative clause which is non-restrictive. In headline 54, the relative clause represented by the non-past relative participle suDuva 'which burn' as a non-restrictive modifier of the conjunct head noun phrase biidi, sigareT, paan involves a metaphor by referring to hike in the price of biidi 'beedi', sigareT 'cigarette' and paan 'pan' (betel leaf). In headline 55, the non-restrictive relative clause tukku hiDida 'rusted' metaphorically refers to the degeneration of the political parties referred by the head noun pakSaagaLu 'parties'.

2.2.1.2 Complement clause + noun(phrase)

The complement clause is formed by the relative participle just as the relative clause is formed. But the complement clause does not include a casual noun(phrase) which is coreferential to the head noun modified by it. Moreover, the relative participle in the complement clause can be replaced by the corresponding

college' defines the headnoun phrase husi bedarike 'false threat'.

In purposive sense. In headline 59, the noun clause

The relative participle + noun (phrase) structure involving relative or complement clause can be preceded by infinitive, past participle, or conditional participle clauses. The headlines with such structures are exemplified below. aashvaasane 'the

58. paraariyaagalu neravaada amaanatu 'the conditional

escape -inf

neravaada amaanatu 'performative subject is not given in

help-pst.rp suspension 'the relative clause or complement

'the suspension which helped(someone) to escape' 'ed from the

59. sinimaa TikeT 'necessary.

cinema ticket

keeLi ode tinda

ask-pp kick eat-pst.rp

kaaleeju vidyaarthi

college student

'the college student who asked for cinema ticket and got

beaten'

60. vargaavargi; loopa dooSa

transfer; defect

iddare saripaDisuva aashvaasane

be-cond set right-npst.rp promise

'the promise to rectify the mistakes if any regarding

transfer'

In headline 58, the noun clause of the relative

helped' is preceded by the infinitive clause paaraariyaagalu 'to escape' in purposive sense. In headline 59, the noun clause ode tinda kaaleeju vidyarthi 'college student who got beaten' is preceded by past participle clause sinimaatikeT keeLi 'having asked for the cinema ticket'. In headline 60, the noun clause containing the complement clause saripaDisuva aashvaasane 'the assurance of getting rectified' is preceded by the conditional clause loopa dooSa iddare 'if there is (any) mistake'.

It is observed that the performative subject is not given in any of the headlines involving relative clause or complement clause discussed above and it has to be recovered from the news story wherever necessary.

2.2.2 Infinitive

The infinitive form of verb is formed by adding the infinitive suffix -alu to the verb root (e.g, maaDu+alu = maaDalu meaning 'to do'). The negative form of the infinitive is obtained by adding -alu to the complex verbal base consisting of negative past participle and iru 'be' (e.g. maaDade + iru + alu=maaDadiralu 'not to do'). The infinitive, affirmative or negative along with the different casual constituents preceding it, constitutes the adverbial clause giving the purposive sense. The infinitive is usually a verb expectant. But, when it is used in newspaper headlines, it is followed by a noun which could become a verb by taking a collocative verbalizer (or explicator verb as given by Sridhar, 1990 : 287) or takes an independent collocative verb. The noun by taking either a verbalizer or a verb as mentioned above, becomes the predicate of the main clause that follows the

adverbial clause of purpose expressed through the infinitive.

To express the adverbial clause of purpose in Kannada, besides the infinitive, there are two other alternative structures, one involving the modal verb beeku 'should' (in the affirmative) or ba^{ara}adu 'should not' (in the negative) followed by the quotative particle endu or anta (e.g., maaDabeeku/baaradu endu) meaning 'to do' / 'not to do it' / 'for doing' or 'for not doing'), the other involving the gerundial noun attached with the purposive case marker- akkaagi (e.g., maaDuvudu + -akkaagi = maaDuvudakkaagi 'for doing or to do' maaDadiruvudu + -akkaagi = maaDadiruvudakkaagi 'for not doing' / 'not to do'). Of these three structures expressing the adverbial clause of purpose, the most precise one is the infinitive structure, which is exclusively preferred in the language of newspaper headlines. The use of the infinitive in clausal nominal headlines is discussed in detail below.

2.2.2.1 Infinitive clause + noun (verbalizer taking)

In clausal nominal headlines involving the infinitive, the nouns that take different verbalizers are more predominantly used after the infinitive.

Examples:

61. caLavaLi tiivragoLisalu nirdhaara
agitation intensity-inf decision

'decision to intensify the agitation'

Janapada kala belesalu manavi

folk art devel-no-inf human

61a. X (nom) caLavaLli(yannu) tiivragoLisabeeku (endu)

 ↓ ↓
 ∅ adhyaapakara korate ∅ niigalu

Y (nom) X(annu) ottaaya (paDisidaru)

↓ ↓ inf
 ∅ ∅ pressurize-pst-3pl

collocative verbalizer, as shown in the underlying structure of each headline. In reconstructing the verb from the noun as said above, the reader, who is a native speaker of the language is facilitated by his internalized grammar. Subjects and other

elements are easily recoverable

None of the casual constituents of the main clause has been specified in any of the above headlines. The subject (nominative) noun (phrase) has been invariably deleted from the adverbial clause containing the infinitive in all the headlines given above. The deleted subject refers to raita sangha 'farmers' association' in headline 61, Mr. Ramesh Krishnan, the wellknown tennis player in 62, sarkaara 'the government' (state or central) in 63, 66, 67, 68 and 69, janaaru 'the public' in 64 and upaadhyaayaru 'teachers' in 65. The above subject nouns are recoverable by the reader either from his previous knowledge of the context or the linguistic context of the headline. The noun referred to by the subject of the adverbial clause recurs in the main clause as subject in headlines 61, 62, 66, 67 and 68, as object in headline 63, as dative in 64, 65 and 69. In some of the headlines, the subject of the main clause is different from the subject of the preceding adverbial clause as revealed in their corresponding underlying structures. In headline 63, the subject of the main clause (Y-nom) is not found to occur in the adverbial clause and it refers to kaaleeju aaDaLita 'college administration' or pooSakara sangha 'parents' association'.

Similarly, in headline 63, the subject (Y-nom) refers to Kariimkhaan 'a scholar in folk literature of Karnataka', in 64 maThaadhapatigalobbaru 'saint' in 65, and in 69, viroodha

paksagaLu 'opposition parties'. These subjects deleted from the main clause are also recoverable from the previous knowledge of the reader or the linguistic context of the headline. There is also a possibility that all the deleted subjects and other casual constituents are easily recoverable from the news story.

2.2.2.2 Infinitive clause + noun (independent verb taking)

The ending noun taking an independent collocative verb is also occasionally found among the clausal nominal headlines involving the infinitive.

Examples:

70. indhana uLisalu

fuel save-inf

hosa saadhana

new device

'new device to save fuel'

70a. indhana(vannu) uLisabeeku endu

save-inf-want

uLisalu

X (nom) hosa saadhana(vannu) (kaNDuhiDiyabeeku)

i

invent-inf-must

71. biLigereyalli raste taDe gumpu

Biligere-loc road blockade group

cadurisu ashruvaayu

bury-pst.rp deadbody exhume-pp

pariikSisalu aadeesha

examine-inf order

'order to exhume and examine the dead body'

73. niiru biTTare koccihoogalu siddha

water release-cond be flooded away-inf ready

'if water is released, (the agitators are) ready to be flooded away'

In headline 72, the past participle huutidda shava horategedu

'having exhumed the dead body' precedes the infinitive + noun

structure. pariikSisalu aadeesha 'order to examine'. In headline

73, the conditional clause niiru biTTare 'if water is released'

precedes the infinitive + noun structure koccihoogalu siddha

'ready to be flooded away'.

The clausal nominal headlines containing the infinitive are attributed with the quality of preciseness to a higher degree.

2.2.3 Past participle

The past participle form of the verb is formed by adding the suffix -u to the past stems taking the past tense markers

-d-, -t-, -k-, -I and -D- (e.g., bared + u = baredu, maret + u =

maretu, nakk + u = nakku, koTT + u = koTTu and koND + u = koNDu)

and by adding the suffix -i to the verb root of those verbs taking -id- as past tense marker. (e.g., maaD + i = maaDi, mucc +

i = mucci and malagis + i = malagisi). The negative form of

past participle is of the structure verb root + aad (e.g., bare +

ade = bareyade and maaD + ade = maaDade). The past participle, affirmative or negative, along with the preceding casual constituents constitutes the adverbial clause with different meaning relationships such as circumstance, manner and reason. The past participle, which is usually a verb expectant, when used in newspaper headlines, it is followed by a noun which is directly derived from a verb or becomes a verb by taking a collocative verbalizer. The ending noun, which is conceived as a verb by the headline reader, functions as the main clause that follows the adverbial clause expressed through the past participle.

2.2.3.1 Past participle clause (adverbial clause of circumstance)

+noun

The adverbial clause containing the past participle is often used in clausal nominal headlines to express the circumstantial meaning.

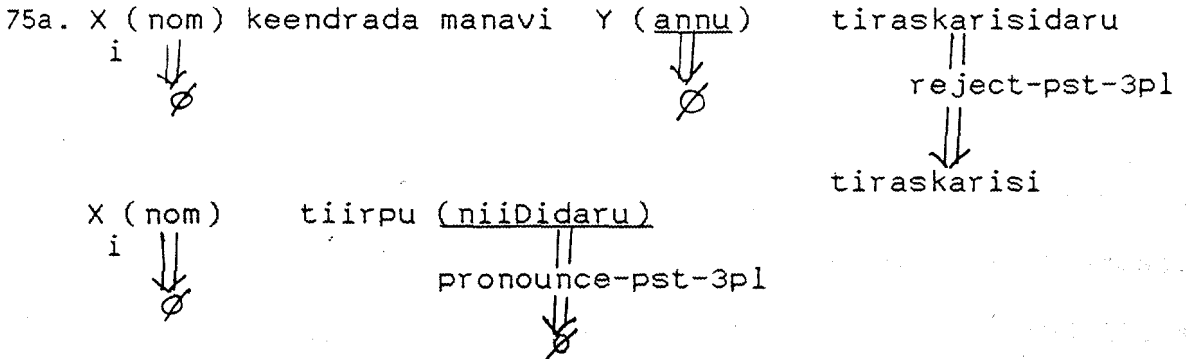

Examples:

74. mandira nirmaaNakke aagrahisi meravaNige
 temple construction-dat pressurize-pp procession
 'procession pressurizing for temple construction'

74a. X (nom) mandira nirmaaNakke Y (annu) aagrahisidaru
 i ↓ ↓ ↓
 ∅ ∅ ∅
 aagrahisi
 X (nom) meravaNige(naDesidaru)
 i ↓ ↓
 ∅ ∅
 take-pst-3pl

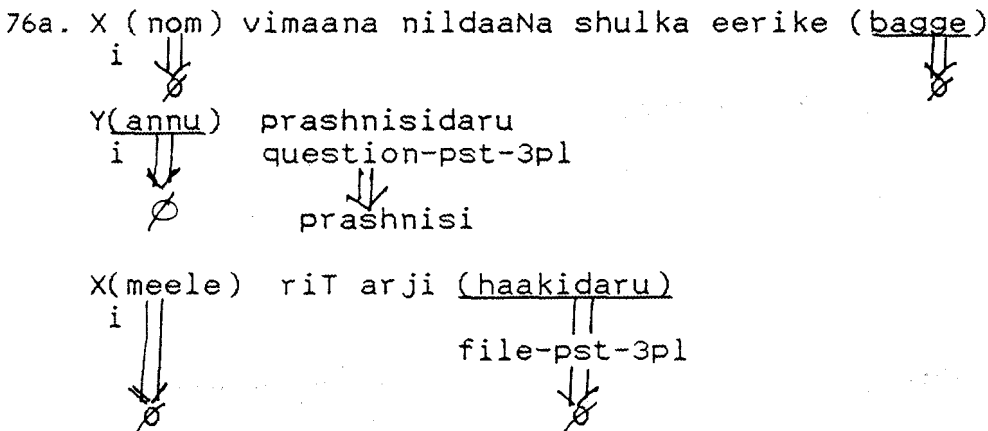

75. keendrada manavi tiraskarisi tiirpu

'judgment rejecting centre's appeal'

76. vimaana nildaaNa shulka eerike prashnisi
 aerodrome entry fee hike question-pp
 riT arji
 writ petition

'writ petition questioning the aerodrome entry fee hike'

The ending noun meravaNige in headline 74, takes the verbalizer naDesu giving the meaning 'take procession', tiirpu in 75 takes the verbalizer niiDu giving the meaning 'pronounce judgment' and riT arji in 76 takes the verbalizer haaku giving the meaning 'file the writ petition' as shown in the respective underlying structures of the above headlines. The ending nouns mentioned above are thus realized as verbs, which serve as the predicates of the main clauses. The past participle clauses,

77a. X (nom) Y (annu) nyaayaalayadallee iridaru

i ↓ stab-pst-3pl
 ↓
 iridu

X (nom) Y (annu) kondaru

i ↓ murder-pst-3pl
 ↓
 kole

78. meravaNigeyalli kusidubiddu saavu
 procession-loc collapse-pp death
 'death collapsing in the procession'

78a. X (nom) meravaNigeyalli kusidu biddaru.

i ↓ collapse-pst-3pl
 ↓
 kusidu biddu

X (nom) sattaru

i ↓ die-pst-3pl
 ↓
 saavu

79. kanigaa neravilladeyee hooraaTa
 Kaniga help be-neg-neg.pp-emp fight
 '(we) fight without the help of Kaniga(an organization)'

79a. X(ge) kanigaa neravu illa-

i ↓ illade

X (nom) hooraaDuttade

i ↓ fight-npst-3sn
 ↓
 hooraaTa

In all the three headlines above, the ending noun is a noun directly derivable from the corresponding verb. In headline 77, the noun kole 'murder' is from the corresponding verb kol 'murder', in 78, saavu 'death' is from saayu 'die' and in 79, hooraaTa 'agitation' is from hooraaDu 'agitate'. These derived nouns are conceived by the headline readers as verbs themselves in the context of their being preceded by the past participle
