Abstract

The aim of the study was to conduct a comparative study of Iranians EFL students' language proficiency at BA level in Isfahan Universities namely Islamic Azad University of Khorasgan, Sheikhbahaee University, and Payam-e Noor university of Baharestan. To this aim, two English Tests were administered to 105 participants including Agricultural Engineering, Management, Law, and Psychology students who had already passed their General English courses. The data collected through the tests were analyzed using SPSS. The result of the data derived from the tests revealed that there was no significant difference between language proficiency of students' at different universities. Furthermore, the students mostly scored low on the English tests which revealed that the objectives of the General English programs were not fully achieved.

Key words: Language, Language proficiency, Language learning

Language proficiency has been defined as the ability to use a language accurately and appropriately in its oral and written forms in a variety of settings (Cloud et al., 2000, P. 60). This definition incorporates the four aspects of language namely listening, speaking, reading and writing. The first two aspects represent oral proficiency is in most cases developed outside the university environment without any exposure to written language.

It is possible to learn English as a foreign language in the home country without having much exposure to or practice with spoken English. While listening and reading represent
receptive skills, speaking and writing represent expressive skills. Receptive skills develop ahead of expressive skills because receiving information is easier than giving it (Cummins, 2003). Most learners understand more than they can express. The essential aspect of academic language proficiency is the ability to make complex meanings explicit in either oral or written modalities of language itself, rather than by means of contextual or paralinguistic cues, for instance, gestures and intonations.

According to Llurda (2000), various adjectives can be associated with the term ‘competence’, like: strategic competence, pragmatic competence, sociolinguistic competence, transitional competence, linguistic competence, discursive competence and communicative competence.

For Ellis (1994, P.696), communicative competence is equivalent to “a language user’s underlying knowledge of language” and “the knowledge that users of a language have internalized to enable them to understand and produce messages in the language”. Edmonson (1981, P.88) considers communicative competence “as being concerned with the encoding, decoding and sequencing of central communicative acts. This includes mastery of the linguistic code (phonology, morphology, syntax, lexicon) together with the function (speech act) expressed. The use of this communicative competence depends on the individual’s social competence”.

Edmonson’s definition may be viewed as nearly equivalent as the constituents of communicative competence in Canale’s (1983) framework, which considers four aspects: grammatical, sociolinguistic, discourse and strategic competences.

Corder (1976) brings about the notion of transitional competence, according to which a learner has some knowledge about a language and this knowledge is under permanent development.

For Stern (1983), proficiency means the actual performance of a learner in a given language, and it involves the mastery of (a) the forms, (b) the linguistic, cognitive, affective and sociocultural meanings of those forms, (c) the capacity to use the language with focus
mainly on communication and minimum attention to form, and (d) the creativity in language use.

Muriel Saville-Troike (2006, P.2), Second Language Acquisition (SLA) refers both to the study of individuals and groups who are learning a language subsequent to learning their first one as young children, and to the process of learning that language. The additional language is called a second language (L2), even though it may actually be the third, fourth, or tenth to be acquired. It is also commonly called a target language (TL), which refers to any language that is the aim or goal of learning. The scope of SLA includes informal L2 learning that takes place in naturalistic contexts, formal L2 learning that takes place in classrooms, and L2 learning that involves a mixture of these settings and circumstances. For example, “informal learning” happens when a child from Japan is brought to the US and “picks up” English in the course of playing and attending school with native English-speaking children with-out any specialized language instruction, or when an adult Guatemalan immigrant in Canada learns English as a result of interacting with native English speakers or with co-workers who speak English as a second language. “Formal learning” that is focus of this study occurs when a high school student in England takes a class in French, when an undergraduate student in Russia takes a course in Arabic, or when an attorney in Colombia takes a night class in English.

Focus of This Study

The present study was conducted among foreign language students. It makes a comparison between levels of language proficiency of students from different universities with different major. Two English Language Proficiency tests were administered and scores of students from different universities compared. The current study aims at answering the following question:

Is there any significant difference between university type and Iranian EFL students’ general language proficiency?

Participants

The study was concerned for students of Humanities and Agriculture. Based on the respondents to the questionnaire and Test 200 A (from Nelson English Language Tests book two intermediate) 105 Iranian students among the 150 students were selected for the present
study. Participants of the study were 105 Iranian students (66 females, 39 males) in the age range of 19 to 26 who were studying General English as a second language in three university: State (Sheikhbahaee university), Azad (Khorasgan University), Payam-e Noor (Baharestan Center) Universities of Isfahan from different majors (Agricultural Engineering, Management, Law, and Psychology). Students took general English course in Winter semester of the 2012-2013 academic year. All three groups were taught by the same instructor. Although different books were used in three universities, there was the same level of difficulty in reading parts of three books. Also, the same grammar instructions were used in the classes for three groups. Moreover, there was the same corpus vocabulary for all three books.

A total of 26 Agriculture Engineering students, 23 Management students, 39 Psychology students, 17 Law students) participated in the study.

Material and Procedure

Three instruments were used in this study: 1) Persian background questionnaires (see appendix A); 2) English proficiency tests (see appendix B and C).

Procedure

At first, the investigator of the present study prepared background Persian questionnaire for students and administered it at the beginning of the term. Background questionnaire was arranged in two parts. The first part included the participants’ personal information (age, sex, university and major/discipline). The participants were asked to select the option in binary choices and fill in the blanks. The second part consisted six items and the participants were asked to select the options. Its aim was to make sure of the participant's homogeneity in terms of the educational level. The questionnaire was intended to investigate the students' attitudes toward English. It clarified whether the students had taken any trip to other countries or they had studied English in private institutes or whether they had used to watch movies in English language or had listened to English music or news. The aim was to minimize the effects of different factors on learning English at university.

After selection of the students based on the questionnaire results, a Nelson English Language Test was administered at the beginning of the term to determine the homogeneity of
the participants in terms of language proficiency. The subjects who scored one standard deviation above and below the mean were selected and those who were out of this range were discarded from the study.

The participants from different universities took part in their natural General English classes at their own specific universities. However, they received the same instructor but no group knew this. After one semester of instruction, another English proficiency test was given to the participants. This test was designed by Cambridge University local Examinations Syndicate (see Appendix C).

**Results**

Statistical Package for Social Sciences (SPSS) was used for statistical operations needed for data analysis. All 105 students took the English proficiency test. The following table shows the participants’ test performance by their universities:

Table 1 illustrates the number of students who participated in this study from each university. It also illustrates the mean and standard deviation of tests total scores by universities. The total score of the tests was 50.

In order to investigate whether there was any relationship between university type and Iranian EFL students’ language proficiency, the investigators mad use of One-Way ANOVA for data analysis. Table 2 illustrates the differences of total scores by university.
As depicted in table 2, there is no significant difference (.995) in the performance of the three groups on tests. This implies that there is no difference between university type and Iranian EFL students’ general language proficiency.

**Discussion**

English as a second language (ESL) is an umbrella term used to describe any one of a number of instructional approaches designed to help English learners acquire English fluency. The last quarter of a decade has seen the birth of second language acquisition (SLA) as a field of study within applied linguistics. Although there were a few studies of how people acquired a second language (L2) before this period (see, for instance, Leopold’s, 1939 admirable study of the speech development of a bilingual child) it is certainly true that the growth in empirical work has been exponential since the late 1960s.

In this study the aim was to see whether any relationship exists between university type and Iranian’s EFL students’ language proficiency level. Results show that no significant difference existed between university type and level of students’ language proficiency. So, all of them have equal chance to learn English. It means that despite the differences in students’ attendance in the class (Payam-e Noor students attend in the class less than students of State and Azad universities) all of the students have equal chance to learn and improve their level of General Language Proficiency.

Low scores of the students showed the low level of language proficiency of the students. High levels of language proficiency facilitate the processing and acquisition of new information and allow the individual to derive meaning with less conscious effort. Therefore General English classes can not guarantee Iranians’ students language proficiency.

Mojtaba Maghsoudi 158
Low level of students’ language proficiency has implication on both educational and learning. On the educational part, those who are in charge should aware of students’ needs and interests. Moreover, the books should introduce target culture. So, students will be motivated to study and their aim is not only passing the course.

On the learners’ part, teachers can raise the learner awareness of their low level of language proficiency and motivated them to be more active. Once the Iranian EFL learners are aware that only focusing on the books won’t help them to raise their language skills they will be more active and will be more cautious to read different books, journals, watch English movies or listen to the news to improve their skills.

The result give raise the idea that, raising the students level of language proficiency can help them in reading, comprehending and writing different texts. With growing the number of the students at universities, it is imperative that theses important matters of writer attitude be made more conspicuous to learners.

Nelson English Language Test

Choose the correct answer. Only one answer is correct.
Last June my brother...1.. a car. He had had an old scooter before, but it ..2.. several times during the spring. "what you want is a second-hand Mini," I suggested. "If you give me the money." He said," ..3.. one tomorrow." " I can't give the money." I replied, "but what about Aunt Myra. She must have enough. We ..4.. her since Christmas but she always hints that we ..5.. go and see her more often."

We told our parents where we were going. They weren't very happy about it and asked us not to go. So ..6.. But later that same day something strange ..7.. A doctor ..8.. us that Aunt Myra ..9.. into hospital for an operation. ".10.. go and see her at the same time," said my mother. "you two go today, but don't mention the money."

When we ..11.. , Aunt Myra ..12.. "I'm not seriously ill," she said," but the doctor insists that ..13.. to drive my car. You can have it if you promise ..14.. me to the seaside now and again." We agreed, and now we quite enjoy our monthly trips to the coast with Aunt Myra.

1. a. Wanted to buy         b. wanted buying
   c. liked to buy          d. liked buying
2. a. was breaking down    b. was breaking up
   c. had broken down      d. had broken up
3. a. I get               b. I'm getting
   c. I'm going to get     d. I'll get
4. a. are not seeing      b. haven't seen
   c. didn't see          d. don't see
5. a. should             b. shall
   c. would               d. will
6. a. that we haven't     b. that we didn't
   c. we haven't         d. we didn't
7. a. occurred           b. took the place
   c. passed              d. was there

   c. has gone           d. has been
10. a. we may not all     b. we can't all
    c. all we can't      d. all we may not
11. a. have come there    b. were arriving
    c. got there         d. came to there
12. a. was seeming quite happily    b. was seeming quite happy
    c. seemed quite happily        d. seemed quite happy
13. a. I'm getting so old   b. I'm getting too old
    c. I get so old         d. I get too old
Choose the correct answer. Only one answer is correct

14. a. taking  b. bringing  c. to take  d. to bring

15. Can this camera …. Good photos?
   a. Make  b. to make  c. take  d. to take

16. Who was the first person …. Today?
   a. Spoke to you  b. you spoke to  c. you spoke  d. whom you spoke

17. I can't find the book …. 
   a. nowhere  b. everywhere  c. anywhere  d. somewhere

18. There was a house at …
   a. The mountain foot  b. the foot of the mountain  
   c. the feet of the mountain  d. the mountain's foot

19. A person who talks to …. Is not necessarily mad.
   a. Himself  b. oneself  c. yourself  d. itself

20. I'll be 13 tomorrow, …..?
   a. am I  b. aren't I  c. won't I  d. will I

21. Did you hear …. Julie said?
   a. What  b. that  c. that what  d. which

22. Spanish people usually speak …. Than English people.
   a. Quicker  b. more quirkier  c. more quickly  d. quicker

23. That old lady can't stop me …. the tennis match on my radio.
   a. To listen  b. listening  c. listen to  d. listening to

24. I haven't got a chair …..
   a. To sit  b. for to sit on  c. to sit on  d. for sitting

25. ……… At moment, I'll go to the shops.
   a. For it doesn't rain  b. as it doesn't rain  
   c. for it isn't raining  d. as it isn't raining

   a. Any  b. none  c. too many  d. so much

27. ….. are very intelligent.
   a. Both of them  b. Both them  c. Both they  d. The both

28. In a shop …. Customers.
a. It is important pleasing  
  b. it is important to please  
  c. there is important pleasing  
  d. there is important to please

29. Don't leave your shoes on the table.  
   a. Put off them!  
   b. take them off!  
   c. pick them off!  
   d. pick up them

30. ……. In my class likes the teacher.  
   a. All persons  
   b. All pupils  
   c. Everyone  
   d. All people

31. We expected about 20 girls but there were …. people there.  
   a. another  
   b. others  
   c. some  
   d. more

32. Your bicycle shouldn't be in the house!  
   a. Take it out!  
   b. Get out it!  
   c. Put it off!  
   d. Take away it

33. What time does the bus ….. Bradford?  
   a. go away to  
   b. go away for  
   c. leave to  
   d. leave for

34. She ….. be Canadian because she's got a British passport.  
   a. can't  
   b. isn't able to  
   c. mustn't  
   d. doesn't need

35. “our daughter …….”, they said.  
   a. Was born since three years  
   b. is born for three years ago  
   c. was born three years ago  
   d. has been born since three years ago

36. When…. English?  
   a. Has he begun to study  
   b. has he begun study  
   c. did he begin to study  
   d. did he begin study

37. Do you want some cheese? No, ……..  
   a. I've some still  
   b. I still have much  
   c. I don't want  
   d. I've still got some

38. Brenda likes going to the theatre and ….  
   a. so do I  
   b. so go I  
   c. so I like  
   d. so I am

39. …….. from London to Edinburgh!  
   a. How long there is  
   b. what a long way it is  
   c. what distance is there  
   d. how long is

40. He's a good guitarist, but he plays the piano ……..  
   a. Quit well  
   b. too hardly  
   c. very good  
   d. much better

41. When you go to the shops, bring me ……..
42. Molly doesn't eat fish.
   a. So doesn't John.  
   b. Neither does John.  
   c. John doesn't too.  
   d. John doesn't that either.

43. The airport is five miles 
   a. away from here  
   b. from here away  
   c. far from here  
   d. far away from here

44. Please ask 
   and see me. 
   a. To Bill to come  
   b. Bill to come  
   c. to Bill come  
   d. Bill come

45. She always buys 
   my birthday. 
   a. anything nice to  
   b. anything nice for  
   c. something awful to  
   d. something awful for

46. Aren't they friends 
   ?
   a. Of yours  
   b. of you  
   c. to yours  
   d. to you

47. She hardly ever eats 
   potatoes. 
   a. Or bread or  
   b. bread or  
   c. neither bread or  
   d. neither bread nor

48. This is the record we 
   
   a. Like so much  
   b. are liking so much  
   c. like it much  
   d. are liking it much

49. She's going to buy 
   new trousers. 
   a. Some part of  
   b. some  
   c. a couple of  
   d. this

50. Is she going to school ? No, 
   
   a. She doesn't  
   b. she's cycling  
   c. she gets by bus  
   d. to the shops
